PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed backend services and APIs using **Python** and **Django** to support real-time data processing infrastructure, handling ~3,500 events/sec during peak hours.
- Built intuitive, user-friendly frontend interfaces with **React** and **Next.js**, creating responsive components that integrated seamlessly with backend services and APIs.
- Collaborated directly with customer engineering teams to gather requirements and build specific features for an AI-powered user interview platform, translating their pain points into actionable development tasks.
- Provided pre-sales technical support to prospective enterprise customers, conducting platform demonstrations and addressing technical questions to highlight product capabilities.
- Led customer-facing projects from conception through production deployment, ensuring scalability and responsiveness for a new AI-moderated research feature.
- Developed and optimized RESTful APIs in **Python** and **Django** for cross-service data exchange, implementing input validation and circuit-breaker patterns.
- Containerized backend services using **Docker** and deployed them to **AWS** (EC2, ECS), configuring basic resource limits for predictable rollouts and managing application lifecycle.

SKILLS

Frontend Development – JavaScript, TypeScript, React, Next.js, HTML, CSS

Backend Development – Python, Django, Java, Spring Boot, REST APIs, GraphQL

Databases – SQL, PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, ECS)

DevOps & CI/CD – Docker, Jenkins, Git, Jira, Confluence

Data & Analytics – Power BI, Tableau, pandas, NumPy, scikit-learn, R

AI/ML – LLM, Large Language Models, AI-powered interviews

PROJECTS

AI-Powered Interview Platform Backend Service

- Developed a **Python Django** backend service to manage and process data for an AI-powered user interview platform, integrating with a PostgreSQL database to store interview transcripts and metadata.
- Designed and implemented RESTful APIs to expose platform functionality to frontend applications and other internal services, supporting real-time data ingestion and retrieval with an average p95 latency of 180ms.
- Containerized the service using **Docker** and deployed to **AWS ECS**, configuring auto-scaling policies to handle fluctuating customer demand and ensuring high availability.

Customer Onboarding for Qualitative Research Tool

- Worked directly with two pilot enterprise customers to design and ship a guided onboarding flow for a new qualitative research tool, including SDK examples and debug tooling.
- Built a **Python** CLI tool to validate customer feature definitions against the platform schema before submission, catching approximately 70% of schema errors at write time.
- Conducted post-sales technical walkthrough sessions with customer data teams to upskill their internal engineers on integrating the research tool into their workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
