PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and implemented **preventative maintenance schedules** for packaging machinery and equipment, coordinating **work order management** and prioritizing tasks to minimize operational disruptions.
- Managed **spare parts inventory** and consumables, collaborating with the compliance technician to ensure timely procurement and availability for critical maintenance activities, reducing stock-out incidents by **15%**.
- Maintained comprehensive **equipment history logs** and documentation for repairs and upgrades, ensuring accurate record-keeping for regulatory compliance and performance analysis.
- Analyzed **equipment performance data**, including MTBF and MTTR, to identify trends and opportunities for enhancing reliability and uptime, contributing to a **10%** improvement in asset availability.
- Coordinated with **production planners** to align maintenance schedules with production output, ensuring minimal impact on operations while upholding equipment safety and reliability standards.
- Identified and proposed process improvements for maintenance planning and scheduling, exploring **predictive maintenance technologies** and reliability-centered strategies to optimize asset performance.
- Managed external **contractor activities** for maintenance and repairs, ensuring adherence to health, safety, and quality standards throughout project execution.

SKILLS

Maintenance Planning – Preventive Maintenance, Work Order Management, CMMS, Autonomous Maintenance, Shutdown Coordination, Contractor Management

Equipment Management – Spare Parts Management, Equipment History, Performance Analysis, MTBF, MTTR

Compliance & Safety – Regulatory Compliance, Good Manufacturing Practices (GMP), Health and Safety Regulations

Process Improvement – Continuous Improvement, Predictive Maintenance, Reliability-Centered Maintenance

Collaboration – Cross-functional Teams, Production Planning, Engineering Collaboration

PROJECTS

CMMS Optimization for Pharmaceutical Equipment

- Enhanced the **Computerized Maintenance Management System (CMMS)** by developing standardized **preventative maintenance plans** for critical packaging machinery, reducing unscheduled downtime by **18%**.
- Integrated spare parts data with the CMMS, creating automated reorder points that improved parts availability by **22%** and decreased emergency procurement costs.
- Documented new CMMS workflows and trained 8 maintenance technicians on updated procedures for work order creation and closure.

Equipment Uptime Improvement Initiative

- Analyzed historical maintenance data for **packaging equipment** to identify root causes of recurring failures, leading to targeted interventions that improved mean time between failures (MTBF) by **15%**.
- Collaborated with engineering teams to implement minor equipment modifications based on performance analysis, resulting in a **7%** reduction in mean time to repair (MTTR).
- Developed a dashboard in **Power BI** to visualize key equipment performance indicators and maintenance backlog, providing actionable insights to management.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
