PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Maintained and updated aircraft specification, maintenance status, and life-limit data within the **Sysco** system, ensuring data integrity for a portfolio of over 400 leased assets.
- Produced detailed **Sysco reports** for portfolio management, aircraft sales, and trading activities, providing critical data points for asset valuation and commercial decisions.
- Proactively identified and resolved data gaps and inconsistencies within the aircraft records and **Sysco portfolio**, collaborating with asset management and commercial teams to uphold data standards.
- Developed Python scripts to automate the generation of **scheduled reports** for portfolio analysis, reducing manual effort by approximately 15 hours per week and improving reporting timeliness.
- Managed production support for enterprise Java applications, responding to P1/P2 incidents and ensuring adherence to strict SLAs for critical business systems.
- Designed and implemented REST APIs using **Java Spring Boot** to facilitate cross-system data exchange for enterprise business systems, supporting integration with ERP modules.
- Containerised Java Spring Boot applications using **Docker** and managed deployments on **AWS EC2** instances, improving deployment consistency and reducing environment setup time by 30%.

SKILLS

Domain – Aircraft Leasing, Aviation Asset Management, Airline Operations, Aircraft Records, Airbus Specifications, Boeing Specifications, Engine Specifications, Maintenance Terminology

Systems – Sysco, ERP Systems

Data Management – Data Integrity, Data Standards, Data Analysis, Data Validation, Life-Limit Tracking

Programming & Scripting – Python, Java, Spring Boot, SQL

Cloud & DevOps – AWS EC2, Docker, Jenkins, Git

Tools – Microsoft Office Suite, Splunk, Dynatrace, Jira, Confluence

PROJECTS

Aircraft Portfolio Data Management System Enhancement

- Developed Python scripts to automate data extraction and validation for aircraft records, processing approximately 5,000 records weekly to identify discrepancies against maintenance logs.
- Implemented a SQL-based data cleansing process for the aircraft specification database, improving data accuracy by an estimated 20% and reducing downstream reporting errors.
- Designed and documented new data standards and validation rules for aircraft life-limit tracking, contributing to a more consistent and reliable asset database.

Automated Reporting for Financial Operations Dashboard

- Engineered Python ETL pipelines to aggregate transaction data from multiple sources, consolidating information for a financial services operations dashboard used by an enterprise client.
- Created automated daily and weekly reports using SQL queries against PostgreSQL and Oracle databases, providing operational insights into transaction monitoring and reconciliation workflows.
- Collaborated with business analysts to gather requirements for new reporting features, ensuring the generated data met stakeholder needs for operational oversight.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
