HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Kubernetes-native** Go applications, including custom controllers and operators, to automate platform provisioning and scaling processes.
- Designed and implemented **Custom Resource Definitions (CRDs)** and reconciliation loops for platform automation workflows, ensuring desired state consistency.
- Built and maintained software to automate operational processes such as scaling, upgrades, and recovery for cloud-native environments.
- Managed and optimized **containerised applications** deployed on **Kubernetes** clusters, focusing on resource utilization and performance tuning.
- Authored detailed technical documentation and runbooks for deployed automation tooling, facilitating knowledge transfer and operational handover.
- Collaborated with cross-functional teams to define technical requirements and design solutions for infrastructure automation initiatives.
- Implemented **observability** for Go applications using tools like Prometheus and Grafana, establishing metrics for performance monitoring and alerting.

SKILLS

Languages – Go, Python, Java, SQL

Cloud Native – Kubernetes, Docker, EKS, Helm, Operators, CRDs

Programming – Golang, controller-runtime, Kubebuilder, client-go, Spring Boot

Infrastructure – Linux, AWS, CI/CD, Jenkins, Git

Automation – Terraform, Ansible, Shell Scripting

Observability – Prometheus, Grafana, Splunk, Dynatrace

PROJECTS

Kubernetes Operator for Application Deployment

- Developed a Go-based Kubernetes Operator using Kubebuilder to automate the deployment and lifecycle management of custom applications within an EKS cluster.
- Implemented reconciliation loops to ensure deployed applications consistently matched the desired state defined by custom resources, reducing manual intervention by **~40%**.
- Integrated the operator with CI/CD pipelines via Jenkins for automated testing and deployment of operator updates.

Platform Automation with Custom Controllers

- Engineered custom controllers in Go to automate routine operational tasks such as certificate rotation and configuration updates for a fleet of **500+** managed nodes.
- Designed and implemented CRDs to define the desired state for managed resources, enabling declarative configuration of the platform.
- Wrote comprehensive unit and integration tests for controller logic, achieving **85% code coverage** and ensuring reliability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
