PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Golang** microservices for global payment platforms, focusing on high-throughput transaction processing and sub-millisecond latency.
- Architected and implemented **RESTful APIs** and gRPC services to support complex, distributed financial systems, ensuring seamless inter-service communication.
- Automated build, deployment, and runtime environments using **Jenkins** CI/CD pipelines and **Terraform** for infrastructure as code, enabling repeatable and reliable deployments.
- Applied strict information security protocols, including **Privileged Access Management (PAM)**, to secure payment processing environments and ensure compliance.
- Mentored junior engineers on Golang best practices and microservices design patterns, contributing to team technical growth and project delivery.
- Collaborated with geographically distributed teams to define technical architecture, scope project deliverables, and estimate development timelines for new features.
- Managed and optimized relational database schemas and queries in **PostgreSQL** and **MongoDB** to support the performance requirements of high-volume transaction systems.

SKILLS

Languages – Go (Golang), Java, Python, SQL.

Frameworks/APIs – RESTful APIs, gRPC, Spring Boot, Microservices Architecture.

Cloud & DevOps – Docker, Kubernetes, Jenkins, Terraform, Ansible, AWS, Linux.

Databases – PostgreSQL, MongoDB, SQL.

Security – Privileged Access Management (PAM), Teleport.

PROJECTS

Golang Payment Gateway Service

- Engineered a high-performance **Golang** microservice to process and route payment transactions, achieving p95 latency below **150ms**.
- Implemented secure communication channels using **TLS** and integrated with upstream financial messaging systems via custom **REST APIs**.
- Containerized the service using **Docker** and deployed it onto a **Kubernetes** cluster, defining resource requests and limits for stable operation.

Automated CI/CD Pipeline for Microservices

- Designed and built an automated CI/CD pipeline using **Jenkins** to facilitate continuous integration and deployment of microservices.
- Integrated static code analysis and security scanning tools into the pipeline, ensuring code quality and adherence to security standards.
- Managed infrastructure provisioning and configuration using **Terraform**, enabling consistent deployment environments across development and staging.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
