PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed AWS account structure, organization, and permission boundaries, including monitoring cost and utilization for a multi-account environment.
- Developed and maintained central infrastructure as code solutions using **Terraform**, enabling product teams to provision necessary resources while enforcing standardization.
- Operated and maintained **GitOps**-based continuous delivery pipelines, supporting all workloads across development, staging, and production environments.
- Managed and maintained **EKS clusters** across multiple environments, including runtime integrations for diverse workloads and ensuring high availability.
- Designed and implemented **REST APIs** in **Java Spring Boot** for cross-service data exchange, incorporating request validation and circuit-breaker patterns.
- Containerized services using **Docker** and deployed them to **Kubernetes** clusters (EKS), configuring resource limits and managing deployments via Helm charts.
- Collaborated with cross-functional engineering teams to simplify platform architecture, build a golden path for service delivery, and address technical debt.

SKILLS

Cloud & Infra – AWS, Kubernetes, Terraform, EKS, Docker, EC2, S3, Lambda, CloudWatch

CI/CD & GitOps – Jenkins, GitHub Actions, Git, ArgoCD

Programming Languages – Java, Python, TypeScript

Backend Frameworks – Spring Boot, FastAPI, Flask

Databases – PostgreSQL, MySQL, Oracle

Observability & Scripting – Splunk, Dynatrace, Linux Shell Scripting

PROJECTS

AWS Account & Resource Management Platform

- Developed a comprehensive **Terraform** module suite to manage AWS account provisioning and standardize resource deployment across multiple teams.
- Implemented granular IAM policies and service control policies (SCPs) to enforce security boundaries and compliance requirements within the AWS organization.
- Created automated checks and alerts for cost anomalies and resource utilization, integrating with **AWS Cost Explorer** and CloudWatch for proactive management.

GitOps-based Continuous Delivery Pipeline Enhancement

- Engineered CI/CD workflows using **GitHub Actions** and **ArgoCD** to automate the deployment of microservices to EKS clusters, reducing manual intervention by **40%**.
- Developed standardized deployment templates and manifest files, ensuring consistent application of configurations and runtime settings across all environments.
- Authored detailed runbooks and conducted internal training sessions on GitOps best practices for development teams, improving deployment stability and speed.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
