HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot microservices** for backend functionalities, processing approximately **2,500 requests per minute** during peak loads.
- Engineered **Python scripts** for automating data ingestion and transformation tasks, reducing manual processing time for critical reports by **40%**.
- Implemented **JPA and Hibernate** for efficient data persistence and retrieval in enterprise applications, managing complex object-relational mappings across multiple entities.
- Collaborated with product and design teams to translate user requirements into technical specifications for new features, participating actively in **sprint planning** and **daily stand-ups**.
- Contributed to the development and refinement of **AI-assisted software development** workflows, integrating AI tools for code completion and debugging while critically validating outputs.
- Containerized backend services using **Docker**, enabling consistent deployment across development and staging environments and streamlining the **CI/CD pipeline**.
- Participated in **code reviews**, providing constructive feedback to peers and ensuring adherence to coding standards and best practices for maintainable code.

SKILLS

Languages – Python, Java, SQL, JavaScript, TypeScript, Go, C++

Frameworks & Libraries – Spring Boot, JPA, Hibernate, React, NestJS

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Data & AI – pandas, NumPy, scikit-learn, AI tools, Machine Learning Fundamentals

Methodologies – Agile, Scrum, CI/CD

PROJECTS

AI-Enhanced Code Generation Service (HCL Technologies)

- Developed a **Python-based service** that integrates with AI models to provide intelligent code suggestions and boilerplate generation for common Java patterns.
- Implemented a **REST API using Flask** to serve AI-generated code snippets, handling over **150 requests per hour** from internal developer tools.
- Designed input validation and output sanitization mechanisms to ensure the accuracy and security of AI-generated code, collaborating with senior engineers on prompt engineering strategies.

Scalable Data Processing Pipeline (MSc Applied Project)

- Constructed an end-to-end data processing pipeline using **Python and pandas** to ingest, clean, and transform large datasets for analytical modeling.
- Applied **scikit-learn** to train a predictive model on processed data, achieving an **AUC of 0.82** on a held-out validation set.
- Deployed the pipeline and model as a containerized application, demonstrating its operability and potential for feature engineering in downstream ML systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
