PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Operated and maintained highly available **Azure** and hybrid cloud network services, focusing on **hub-and-spoke** and **Virtual WAN** architectures.
- Managed network security controls including **Network Security Groups**, **Azure Firewall**, and network segmentation for controlled ingress and egress traffic.
- Supported hybrid connectivity using **ExpressRoute**, site-to-site VPNs, and BGP integration with on-premises routing platforms.
- Developed and maintained **Infrastructure as Code** using **Terraform**, applying peer review and controlled deployment practices to network changes, impacting approximately **15** network resource deployments per sprint.
- Monitored network health, flow, latency, and availability using **Azure Monitor** and **Network Watcher**, identifying and addressing an average of **3** performance bottlenecks per week.
- Troubleshot complex issues across DNS, routing, firewalls, and load balancing, resolving an average of **5-7** critical connectivity incidents per month.
- Collaborated with security and platform engineering teams to deliver secure and reliable connectivity for business-critical platforms, contributing to **3** major platform upgrades.

SKILLS

Cloud Platform – Microsoft Azure, Azure Virtual Network, Azure Monitor, Network Watcher, ExpressRoute, VPN Gateway, NAT Gateway, Private Link, Service Endpoints, Azure DNS, Private DNS, Azure Load Balancer, Application Gateway, Front Door, Azure Firewall, Web Application Firewall, DDoS Protection, Network Security Groups.

Infrastructure as Code – Terraform, ARM Templates.

Networking Protocols – TCP/IP, IPv4, Subnetting, DNS, DHCP, NAT, Routing, BGP, VPNs, TLS.

Automation & Scripting – PowerShell, Azure CLI, Bash, Python.

Observability & Monitoring – Splunk, Dynatrace, CloudWatch.

Core Engineering – Linux, Git, Jenkins, Docker, Agile methodologies.

PROJECTS

Azure Hybrid Network Architecture Implementation

- Designed and deployed a secure **Azure** hub-and-spoke network topology integrating with an on-premises data center via **ExpressRoute** for a financial services client.
- Configured **Network Security Groups** and **Azure Firewall** policies to enforce granular access controls and protect critical applications, reducing unauthorized access attempts by an estimated **40%**.
- Automated the deployment of virtual networks, subnets, and routing configurations using **Terraform**, enabling repeatable and consistent network provisioning.

Cloud Network Automation and Monitoring Enhancement

- Developed **Python** scripts to automate the retrieval and analysis of network flow logs from **Azure Network Watcher**, identifying traffic patterns and potential security anomalies.
- Implemented custom alerts within **Azure Monitor** to detect deviations in network latency and packet loss for key services, reducing manual monitoring overhead by approximately **30%**.
- Created comprehensive runbooks and documentation for network troubleshooting procedures, improving incident response time for common connectivity issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
