HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and built **full-stack applications**, including **customer-facing integrations** and **AI agent workflows**, on top of the Protex platform to address operational challenges for enterprise clients.
- Collaborated directly with **senior operations leaders** at manufacturing and logistics companies to understand their challenges, translate ambiguous problems into technical solutions, and deliver measurable business outcomes.
- Developed **customer solutions** end-to-end, from technical discovery and rapid prototyping through to production deployment and handover, ensuring successful integration into customer environments.
- Proactively investigated customer data using **SQL** and **APIs** to uncover inefficiencies and operational risks beyond the original use case, identifying opportunities for new value.
- Built and deployed **AI agents** and **workflows** on the Protex platform, combining computer vision insights with enterprise data to explain performance and flag areas for attention.
- Constructed **prototype capabilities** that were rapidly tested against real customer data, with successful experiments being turned into production solutions that shaped future platform development.
- Containerized and deployed **Python** and **Java Spring Boot** services on **AWS EC2** using **Docker**, configuring basic resource limits and ensuring predictable rollouts.

SKILLS

AI Engineering – LLMs, Agentic Workflows, Computer Vision, Multimodal AI, Vision-Language Models, AI Coding Tools, Codex, Claude Code

Development – Full-Stack Development, Python, Java, Spring Boot, REST APIs, FastAPI, Microservices, System Integrations, APIs, SQL

Cloud & DevOps – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes, CI/CD, Jenkins, Git

Data & Analytics – Data Pipelines, ETL, Data Warehousing, Data Modelling, PostgreSQL, MySQL, Oracle

Customer Facing – Pre-Sales, Post-Sales, Solutions Engineering, Customer Onboarding, Technical Discovery, Proof of Value, Stakeholder Communication

Methodologies – Agile, Scrum, Change Management, Incident Response, Problem Solving, Product Thinking, Ownership

PROJECTS

Customer Site Intelligence Solution (Protex AI)

- Developed a **full-stack application** to integrate camera feed data with enterprise system logs, providing real-time operational insights for a pilot customer in the logistics sector.
- Built **AI agents** using Python to analyze throughput data, identify bottlenecks, and trigger alerts, reducing manual investigation time by approximately 40% for the customer's operations team.
- Deployed the solution on **AWS Lambda** and **EC2**, integrating with the customer's internal APIs and delivering a functional proof of value within a 3-week engagement.

Production Data Pipeline for Operational Analytics (HCL)

- Engineered a **Python ETL pipeline** to ingest and transform data from multiple enterprise systems, including a **payments operations dashboard**, into a centralized data warehouse using **PostgreSQL**.
- Developed **SQL scripts** for data validation and schema management, ensuring data quality for downstream analytical reporting and transaction monitoring workflows.
- Automated the pipeline execution using **Jenkins** and **cron jobs** on **Linux**, reducing manual data processing efforts by 15 hours per week.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
