PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Led the technical implementation for **three enterprise client engagements**, translating complex business requirements into actionable engineering tasks and overseeing the integration of the scientific intelligence platform.
- Integrated the platform with **client data rooms and internal systems**, including secure data extraction from document repositories and licensed databases, adhering to strict security protocols.
- Developed client-specific **workflow configurations and data processing extensions** using Python and SQL, ensuring they met production-level quality standards for reliability and maintainability.
- Applied **LLM-based retrieval and extraction techniques** to analyze client-provided clinical trial data and scientific literature, evaluating outputs for accuracy and defensibility in high-stakes dealmaking contexts.
- Partnered with the data science team to onboard new client data sources, establishing **data provenance and quality standards** that enabled clients to trust the analytical results.
- Acted as the primary technical point of contact for **two strategic accounts**, managing day-to-day technical queries and supporting pre-sales technical discovery sessions.
- Containerized deployment configurations using **Docker** and managed deployments to **AWS environments**, ensuring consistent application of security and networking policies across client instances.

SKILLS

Core Engineering – Python, SQL, Java, Spring Boot, REST APIs, Microservices, Docker, AWS, Linux, Git, Jenkins, Jira, Confluence.

Data & AI – LLMs, Retrieval Augmented Generation (RAG), Data Integration, Data Quality, Machine Learning Fundamentals, scikit-learn, pandas, NumPy.

Client & Deployment – Forward Deployed Engineering, Solutions Engineering, Client Onboarding, Technical Consulting, Pre-Sales Support, Post-Sales Support, Requirements Gathering, System Integration.

Cloud & Operations – AWS (EC2, S3, Lambda, CloudWatch), CI/CD, Production Support, Incident Response, SLA Management, Observability.

Database & Data Handling – PostgreSQL, MySQL, Oracle, Data Warehousing, ETL, Power Query, DAX.

PROJECTS

Client Integration Framework for Scientific Intelligence Platform

- Engineered a reusable Python framework to streamline the integration of diverse client data sources (databases, APIs, file shares) into the core platform, reducing average integration time by **~35%**.
- Developed robust data validation and transformation modules using SQL and pandas to ensure data quality and consistency across disparate client datasets before ingestion.
- Implemented secure credential management and data transfer protocols, meeting enterprise security review requirements for client data handling.

AI-Powered Evidence Synthesis for Due Diligence

- Built a proof-of-concept application using LangChain and an LLM to synthesize key findings from unstructured scientific literature and internal deal documents for a hypothetical biotech client.
- Developed prompt engineering strategies and RAG techniques to extract specific information related to drug efficacy and clinical trial outcomes, achieving a **~92% accuracy rate** on a curated test set.
- Packaged the application as a Python script with clear input parameters and output formatting, demonstrating its potential for accelerating scientific diligence workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
