PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Validated portfolio and transaction activity, including trades, income, corporate actions, and deal restructurings, within sub-ledger systems for a financial-services client.
- Reconciled daily cash activity against bank statements, identifying and resolving discrepancies with banking partners to ensure accurate cash positions.
- Prepared and verified general ledger entries, ensuring all financial transactions were accurately recorded and aligned with accounting principles.
- Developed Python scripts to automate the extraction, transformation, and loading of financial data, reducing manual data processing time by approximately 30% for monthly reporting.
- Managed production support for enterprise applications, responding to P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace**, meeting strict SLA targets.
- Designed and implemented REST APIs using **Java Spring Boot** for cross-service data exchange, enhancing system interoperability and enabling new feature development for internal platforms.
- Containerised Java Spring Boot applications using **Docker**, facilitating consistent deployment across development, staging, and production environments on **AWS EC2**.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Power BI, Tableau, Splunk, Dynatrace, Jira, Confluence

Financial Domain – Transaction Monitoring, Reconciliation Workflows, Financial Statement Analysis, GAAP & STAT Principles

PROJECTS

Financial Operations Dashboard Enhancement

- Developed new features for a payments operations dashboard using **Java Spring Boot** and **PostgreSQL**, focusing on improved transaction monitoring and alerting for failed payment messages.
- Automated data reconciliation workflows by writing **Python** scripts, which processed approximately 15,000 transaction records daily, identifying discrepancies for operational review.
- Enhanced existing dashboard reporting capabilities, creating new views in **Power BI** that visualized key operational metrics for business stakeholders, aiding in faster issue identification.

Enterprise System Integration Automation

- Created **Python**-based ETL pipelines to extract and transform data from disparate enterprise systems, integrating data flows between ERP modules and operational platforms.
- Designed and implemented REST APIs using **Java** to facilitate real-time data exchange between internal applications, supporting cross-system integrations and reducing data latency by **~40%**.
- Managed change control processes for system configuration updates and coordinated User Acceptance Testing (UAT) for integrated systems, ensuring smooth post-go-live operations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
