HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed generative AI solutions using **Microsoft 365 Copilot** and internal **LLM platforms**, translating business requirements into secure, scalable AI agents.
- Created and optimised **prompts, skills, and workflows** for AI agents and Copilots to enhance business process automation and user efficiency.
- Collaborated with **AI Solution Engineers** and **Architects** to confirm technical feasibility, define integration requirements, and establish solution patterns for complex AI deployments.
- Integrated AI agents with **enterprise applications**, **SharePoint**, and **Microsoft 365 services** to enable seamless data flow and automated task execution.
- Applied **Generative AI and LLM best practices**, including prompt engineering and context management, to maximise solution quality and reliability.
- Supported business users during **UAT execution**, analysing feedback and defects to refine AI solutions and ensure user satisfaction.
- Contributed to the development of reusable components and **development standards** for agentic AI delivery, promoting best practices across the team.

SKILLS

AI Platforms – M365 Copilot, Large Language Models (LLM), Claude, ChatGPT, Azure AI, AWS AI, GCP AI

AI Development – Agentic Orchestration, Prompt Engineering, Context Engineering, RAG, Knowledge Grounding, Skills, Workflows, Copilot Studio, Microsoft 365 Agents SDK

Software Development – Java, Spring Boot, Python, REST APIs, SQL, PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Data & Analytics – Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn, Data Modelling

Methodologies – Agile, Scrum, Change Management, Incident Response, UAT Support

PROJECTS

AI-Powered Agent for Customer Onboarding

- Developed an AI agent using **Python** and **FastAPI** to automate key steps in the customer onboarding process for enterprise clients, reducing manual effort by approximately 40%.
- Engineered prompt templates and retrieval logic to ground the agent's responses in client-specific documentation, ensuring accurate and relevant information delivery.
- Integrated the agent with internal systems via **REST APIs** and **SQL databases** to fetch and update customer data in real-time.

Intelligent Document Processing Solution

- Designed and implemented an AI solution to extract key information from unstructured documents using **LLM capabilities** and **RAG techniques**, improving data capture efficiency.
- Trained a custom classification model (scikit-learn) on a dataset of 15,000 documents to route incoming queries to the appropriate AI agent, achieving 92% accuracy.
- Deployed the solution using **Docker** on an **AWS EC2** instance, creating a scalable and accessible service for document analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
