PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed AI-powered agents and Copilots using **M365 Copilot** and a proprietary **Large Language Model (LLM)**, translating business requirements into secure, scalable solutions.
- Created and optimised **prompts**, **skills**, and **workflows** for agentic AI solutions, ensuring alignment with business objectives and maximising solution quality.
- Collaborated with business stakeholders and AI Solution Engineers to define technical architectures and integration requirements for complex AI deployments, including enterprise applications and **Microsoft 365 services**.
- Applied **Generative AI** and **LLM best practices**, including evaluation and testing, to ensure solution relevance and reliability, contributing to measurable business value.
- Supported business users during **UAT execution**, analysing feedback and defects to refine AI solutions before deployment.
- Contributed to the development of reusable components, development standards, and **best practices for agentic AI delivery**, fostering a culture of continuous improvement.
- Managed production support for enterprise Java/.NET applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring SLA adherence for critical financial services operations dashboards.

SKILLS

AI/ML Platforms – M365 Copilot, Large Language Models (LLM), Generative AI, Claude Code, GitHub Copilot

AI Concepts – Prompt Engineering, Agentic Orchestration, Retrieval Augmented Generation (RAG), Knowledge Grounding, Responsible AI

Cloud Platforms – Azure, AWS, GCP

Development Tools – Copilot Studio, Microsoft 365 Agents SDK, Git, Jenkins

Programming Languages – Python, Java

Databases & Data Handling – SQL, PostgreSQL, MySQL, Oracle, Data Warehousing

Observability & Support – Splunk, Dynatrace, CloudWatch

PROJECTS

AI Agent Development for Process Automation

- Developed an AI agent using **LangChain** and a **proprietary LLM** to automate a repetitive internal business process, reducing manual effort by an estimated **20%**.
- Engineered prompt templates and retrieval augmented generation (RAG) pipelines to ground the AI agent's responses in firm-specific documentation stored in **SharePoint**.
- Integrated the AI agent with internal APIs and enterprise applications via **Python** scripts, ensuring secure data exchange and workflow orchestration.

LLM-Powered Knowledge Assistant

- Designed and implemented a knowledge assistant using **FastAPI** and an open-source **LLM** to provide quick answers to common technical queries from internal engineering teams.
- Built a vector database using **PostgreSQL** with the pgvector extension to store and efficiently retrieve information from a corpus of **1,500+** technical documents.
- Containerised the application using **Docker** and deployed it to an **AWS EC2** instance, ensuring scalability and accessibility for development teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
