HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python** scripts to automate data extraction and transformation tasks, processing approximately **50 GB** of raw logs daily for downstream analysis.
- Engineered **SQL** queries and scripts for data validation and schema evolution across **PostgreSQL** and **MySQL** databases, supporting updates for **3 enterprise systems**.
- Designed and implemented **Java Spring Boot** REST APIs to facilitate data exchange between internal services, handling over **1,500 requests** per minute during peak hours.
- Maintained and enhanced rulesets for parsing, classifying, and transforming raw behavioral event data into structured datasets, ensuring accuracy as data sources evolved.
- Investigated and resolved discrepancies in rule matching and data output following application updates, identifying root causes and implementing fixes within **24-hour SLAs**.
- Wrote and optimized **SQL** queries against analytical databases, incorporating joins, aggregations, and window functions to support data analysis requirements.
- Containerized data processing services using **Docker** and managed deployments on **AWS EC2** instances, improving deployment consistency and reducing setup time by **40%**.

SKILLS

Data Engineering – SQL, Python, Data Pipelines, ETL, Data Transformation, Data Quality, Data Warehousing, JSON, Semi-structured Data

Cloud Platforms – AWS (S3, Lambda, Glue, EC2), CloudWatch

Programming Languages – Python, Java, SQL, JavaScript, TypeScript

Databases – PostgreSQL, MySQL, Oracle, Amazon Athena, ClickHouse, Redshift

Tools & Technologies – Docker, Git, Jenkins, Jira, Confluence, Splunk, Dynatrace, pandas, NumPy, scikit-learn, FastAPI

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, Statistical Analysis, R

Methodologies – Agile, Scrum, CI/CD

PROJECTS

Behavioral Data Transformation Pipeline (HCL Technologies)

- Developed a **Python**-based data pipeline to ingest and transform semi-structured behavioral event data from **AWS S3** into a queryable format for analysis.
- Implemented complex parsing logic for **JSON** payloads and applied transformation rules using custom scripts, increasing data usability for analytics teams by an estimated **30%**.
- Wrote unit tests and integration checks for the pipeline components, ensuring data integrity and adherence to schema definitions before release.

Rule-Based Event Classification System (MSc Project)

- Designed and implemented a system using **Python** and **SQL** to classify and structure raw event logs based on predefined matching rules.
- Extracted features from event data, including user interactions and timestamps, and stored results in a relational database, supporting over **10,000 records** daily.
- Documented the rule logic and data schemas, enabling researchers to understand and utilize the processed data for behavioral analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
