HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Python** scripts to automate data ingestion and transformation processes for internal reporting, reducing manual effort by approximately 40%.
- Designed and implemented **Java Spring Boot** RESTful APIs for inter-service communication, handling approximately 500 requests per minute during peak loads.
- Managed incident response and SLA adherence for critical enterprise applications using **Splunk** and **Dynatrace**, resolving P1/P2 issues within defined timelines.
- Built and maintained **cloud-native** infrastructure using **AWS** services (EC2, S3, Lambda) and containerized applications with **Docker** for scalable deployments.
- Collaborated on **cloud architecture** and implemented **infrastructure as code (IaC)** principles to provision and manage cloud resources efficiently.
- Contributed to **Generative AI** use cases for cloud operations, focusing on automating routine tasks and enhancing system monitoring capabilities.
- Enhanced **CI/CD pipelines** using **Jenkins** and Git, facilitating automated testing and streamlined deployment of code changes.

SKILLS

Cloud Platforms – AWS, GCP, Azure

DevOps – CI/CD pipelines, automation tools

Generative AI (GenAI) – Applied AI for cloud automation

Programming Languages – Python, JavaScript, TypeScript

Cloud Infrastructure – Infrastructure as Code (IaC)

Containerization – Docker, Kubernetes

Observability – Splunk, Dynatrace, CloudWatch

PROJECTS

Cloud Automation Framework Development

- Engineered a **Python**-based framework to automate the provisioning and configuration of **AWS** infrastructure, enabling self-service deployment of development environments.
- Integrated **Docker** containers into the CI/CD pipeline for consistent build and deployment across different environments, reducing deployment failures by 30%.
- Developed modular scripts for managing cloud resources using **infrastructure as code (IaC)** principles, improving repeatability and reducing configuration drift.

Generative AI for Cloud Operations Tooling

- Developed a proof-of-concept application using **Python** and a **Generative AI** model to analyze cloud operational logs and generate incident summaries.
- Implemented a **REST API** using **FastAPI** to serve AI-generated insights, allowing integration with existing monitoring dashboards.
- Researched and applied techniques for prompt engineering and fine-tuning to improve the accuracy of AI-generated operational insights.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
