HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered **Python** backend services for a data analysis and trading platform, integrating **streaming data** and reference feeds from multiple providers.
- Developed **distributed systems** using **Python**, focusing on message-based architectures to deliver data to modelling systems.
- Collaborated with **quantitative researchers** and engineers to translate complex requirements into reliable **Python** software solutions.
- Designed and implemented **REST APIs** in **Java Spring Boot** for cross-service data exchange, incorporating request validation and circuit-breaker patterns.
- Automated ETL processes and scheduled reporting using **Python** scripting, improving data pipeline efficiency for enterprise business systems.
- Managed production support for enterprise Java/.NET applications, performing **SLA management** and P1/P2 incident response across diverse systems.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits for predictable rollouts.

SKILLS

Languages – Python, Java, SQL, R, Bash

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI, Hibernate

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins

Databases – PostgreSQL, MySQL, Oracle

Tools – Jira, Confluence, Splunk, Dynatrace, Git

BI/Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling

PROJECTS

Distributed Data Ingestion System (HCL Technologies)

- Built a distributed message-based system using **Python** and **Kafka** to ingest and process high-volume streaming data from external providers.
- Developed data pipelines to transform and load diverse datasets into a central data warehouse, supporting analytical and modelling requirements.
- Implemented robust error handling and monitoring mechanisms, ensuring data integrity and system reliability for the financial services dashboard.

Trading Platform Backend Services (MSc Project)

- Designed and developed **Python** backend services to support a trading analysis platform, focusing on efficient data retrieval and processing.
- Integrated with mock external market data feeds and implemented tools for recording and evaluating pricing data, achieving p95 latency under 200ms.
- Wrote comprehensive unit tests using **pytest**, ensuring code quality and maintainability for core platform functionalities.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
