PROJECTS

Capital Project Performance Dashboard (Power BI)

- Developed a comprehensive **Power BI dashboard** to visualize key performance indicators for large-scale capital projects, including schedule adherence, budget variance, and risk status.
- Applied **DAX measures** and **Power Query** transformations to aggregate data from multiple sources, providing real-time insights to project stakeholders.
- Designed interactive reports and visualizations that enabled project managers to quickly identify bottlenecks and make data-informed decisions.

Process Automation for Project Reporting (Python)

- Engineered **Python scripts** to automate the collection and consolidation of project status reports from various team members and systems.
- Implemented data validation checks to ensure accuracy and completeness of the input data, reducing data-related errors in final reports by approximately **20%**.
- Integrated the automation script with a scheduling tool to generate daily and weekly reports, freeing up approximately **5 hours** of manual work per week for the project team.
