PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided hands-on support for **Emerson DeltaV DCS**, troubleshooting control modules, sequences, and alarms for small molecule manufacturing operations.
- Responded to automation-related production issues during shift operations, minimizing downtime and ensuring continuity of manufacturing activities.
- Investigated automation faults and recurring system issues, contributing to root cause analysis and the implementation of corrective actions in a regulated manufacturing environment.
- Executed approved changes to **DCS configurations** and control strategies in accordance with site procedures and change control requirements.
- Collaborated with manufacturing, engineering, and quality teams to resolve issues and facilitate effective shift handovers, ensuring compliance with **GMP** and data integrity.
- Developed and maintained **Python scripts** for automating data extraction from operational logs for analysis and reporting, reducing manual effort by approximately **15%**.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, handling P1/P2 incident response and SLA management.

SKILLS

DCS & Automation – Emerson DeltaV, Foxboro DCS, Control Modules, Sequences, Alarms, Interlocks, Process Control Functionality, Automation Support, Troubleshooting

Manufacturing & Compliance – Small Molecule Manufacturing, Peptide Manufacturing, GMP, Data Integrity, Change Control, Deviation Management, Validation, Site Safety, Quality Requirements

Software Engineering – Java Spring Boot, REST APIs, Python Scripting, SQL, Docker, Linux, Git, Jenkins

Cloud & Observability – AWS (EC2, S3, Lambda, CloudWatch), Splunk, Dynatrace

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R/RStudio, pandas, NumPy, scikit-learn

ERP & Systems – ERP Integration Support, Enterprise Business Systems, Change Management

PROJECTS

DeltaV System Reliability Enhancement (HCL Technologies)

- Enhanced the reliability of an industrial **Emerson DeltaV DCS** by developing custom diagnostic scripts in **Python** to pre-emptively identify common failure points in control modules.
- Automated the generation of daily operational reports from system logs using **Python** and **SQL**, reducing report generation time from 3 hours to under 30 minutes.
- Contributed to the root cause analysis of **5+ critical incidents** impacting manufacturing uptime, implementing corrective actions that improved system stability.

Production Monitoring Dashboard Automation (HCL Technologies)

- Developed automated data pipelines using **Python** and **SQL** to ingest operational data from multiple enterprise systems for a financial-services client's monitoring dashboard.
- Built interactive **Power BI** dashboards to visualize transaction flow status and system health metrics, enabling operations teams to identify and address **~30% more** anomalies proactively.
- Refactored inefficient relational database queries in **PostgreSQL**, improving data retrieval performance for critical operational reports by an average of **20%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
