HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and deployed scalable cloud infrastructure on **AWS** using **Terraform** for automated provisioning of EC2, S3, and VPC resources, supporting a 40% increase in application throughput.
- Managed and optimized **Kubernetes** clusters (EKS) for production workloads, focusing on resource allocation, scaling policies, and ensuring high availability for critical services.
- Developed and maintained robust CI/CD pipelines using **GitHub Actions**, automating build, test, and deployment processes, reducing deployment time by **30%**.
- Implemented comprehensive monitoring and alerting strategies using **Splunk** and **CloudWatch**, enabling proactive incident detection and reducing P1/P2 response times by **25%**.
- Integrated event-driven services with **Kafka**, building resilient message consumers and producers to handle high-volume data streams, processing an average of **5,000 events** per second.
- Collaborated with engineering teams to define and improve deployment practices, contributing to a more reliable and efficient release cycle and enhancing developer experience.
- Automated routine operational tasks and system configuration management using **Python** scripting and shell commands on **Linux** environments.

SKILLS

Cloud Platforms – AWS, EC2, S3, Lambda, CloudWatch

Container Orchestration – Kubernetes, EKS

Infrastructure as Code – Terraform

CI/CD – GitHub, GitHub Actions, Jenkins

Messaging & Streaming – Kafka, RabbitMQ, SQS

Monitoring & Observability – Splunk, Dynatrace

Scripting & Automation – Python, Linux Shell Scripting

PROJECTS

AWS Infrastructure Automation for Enterprise Applications

- Automated the provisioning and management of **AWS** infrastructure, including **EC2** instances, **S3** buckets, and network configurations, using **Terraform**.
- Implemented CI/CD pipelines with **GitHub Actions** to deploy application updates automatically to the provisioned cloud environment, reducing manual deployment overhead by **40%**.
- Configured **CloudWatch** alarms and dashboards to monitor application health and resource utilization, enabling faster identification of performance bottlenecks.

Kubernetes-based Platform for Event-Driven Services

- Deployed and managed containerized microservices on **Kubernetes** (EKS), ensuring scalability and high availability for data streaming applications.
- Integrated **Kafka** as a central message broker to support event-driven architectures, facilitating asynchronous communication between services and handling approximately **3,000 messages** per minute.
- Developed automation scripts in **Python** to streamline Kubernetes cluster operations, including log aggregation and routine health checks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
