PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python**-based agentic AI applications, integrating **LLM** capabilities for enterprise-scale solutions.
- Developed and deployed **machine learning models** using **Scikit-learn**, achieving an **AUC of ~0.86** on a held-out dataset for anomaly detection.
- Architected and built **production-grade Python applications**, ensuring adherence to software engineering principles and best practices for reliability.
- Contributed hands-on to **Python development** for advanced AI systems, including research and implementation of emerging **AI/ML techniques**.
- Supported enterprise **MLOps/LLMOps practices** and contributed to platform design, enhancing deployment and monitoring workflows.
- Troubleshot complex technical issues in **production environments**, providing timely solutions and contributing to performance testing and scalability improvements.
- Containerized AI services using **Docker** and deployed them to a **Kubernetes** cluster on **AWS**, managing CI/CD pipelines with **Jenkins**.

SKILLS

AI/ML Engineering – Agentic AI, LLMs, Generative AI, Machine Learning Models, AI Agents, AgentOps, Prompt Engineering

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Scikit-learn, TensorFlow, LangChain, Strands, FastAPI, Flask, Spring Boot, pandas, NumPy

Cloud & DevOps – AWS, Docker, Kubernetes, Jenkins, MLOps, LLMOps, CI/CD, EC2, S3, Lambda, CloudWatch

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Jira, Confluence, Git, Agile, Scrum, Data Modelling, Power BI, Tableau, RStudio

PROJECTS

Agentic AI Orchestration Framework

- Developed a modular **Python** framework for orchestrating complex AI agent workflows, enabling task decomposition and execution for multi-step problem solving.
- Integrated multiple **LLM** providers via a unified API, allowing for flexible model selection and experimentation within agentic applications.
- Implemented robust error handling and state management for agent execution, ensuring reliability across extended operational cycles.

ML Model Deployment Pipeline for Fraud Detection

- Engineered a **Python** pipeline to extract behavioural features from transaction logs for a fraud detection model, processing approximately **1.1 million records**.
- Trained and evaluated a **LightGBM classifier** on extracted features, achieving an **AUC of 0.91** and an F1 score of 0.46 on a 1:140 imbalanced dataset.
- Packaged the trained model behind a **FastAPI** inference endpoint, implementing input validation and logging p95 latency at **180ms**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
