HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed, deployed, and maintained scalable **AWS cloud infrastructure** (EC2, S3, Lambda) to support AI application workloads, ensuring high availability and security.
- Developed and managed **CI/CD pipelines** using **Jenkins** and **Git**, automating software delivery processes and reducing deployment times by approximately **40%**.
- Implemented **Infrastructure as Code** using **Terraform** and **CloudFormation** to provision and manage cloud resources, enabling consistent and repeatable deployments.
- Contributed to **cloud architecture** design and solutioning, collaborating with senior engineers to define scalable and resilient infrastructure for AI services.
- Supported the transition of **AI applications** into production AWS environments, focusing on deployment, scaling, and operational readiness.
- Enhanced **monitoring and security** by configuring **CloudWatch** alerts and implementing **IAM** policies, improving incident detection and response times.
- Authored comprehensive **technical documentation**, including architecture diagrams and operational playbooks, to facilitate knowledge sharing and streamline support.

SKILLS

Cloud Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, IAM, High Availability, Platform Resilience, Disaster Recovery

CI/CD & Automation – Jenkins, Git, Source Control Workflows, Automated Deployment Pipelines

Infrastructure as Code – Terraform, CloudFormation

AI/ML Support – AI Application Deployment, ML Workloads, Data Pipelines, Cloud-based Data Processing

Scripting & Languages – Python, Bash

Containerisation – Docker, Containerised Applications

Methodologies – Agile Delivery, Scrum Ceremonies, Change Management

PROJECTS

AWS AI Platform Deployment Automation

- Automated the deployment of AI/ML workloads on **AWS** using **Terraform** and **Jenkins**, enabling rapid provisioning of development, staging, and production environments.
- Configured **Docker containers** for AI model serving applications and integrated them into a **CI/CD pipeline**, ensuring consistent builds and deployments.
- Developed **Python scripts** to automate data pipeline setup and monitoring configurations within the cloud environment, supporting data scientists' workflow.

Cloud-Native Monitoring and Alerting System

- Designed and implemented a centralized monitoring system using **AWS CloudWatch** and **Splunk** for AI applications, capturing critical performance metrics and logs.
- Configured custom alerts and dashboards to proactively identify potential issues in application performance and infrastructure health, reducing P1 incidents by **~20%**.
- Created detailed **operational documentation** and runbooks for incident response and system recovery procedures, enhancing team preparedness.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
