PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **distributed systems** and **traffic security platforms** using **Go**, focusing on improving **platform reliability** for a global user base.
- Developed high-performance network services using **Rust**, contributing to the modernization of critical legacy infrastructure and enhancing **operational efficiency**.
- Investigated and resolved complex **networking** and **production incidents** across distributed systems, applying strong **root cause analysis** skills to maintain stability.
- Contributed to engineering best practices by writing comprehensive **technical documentation** and improving **automated testing** coverage for critical infrastructure components.
- Maintained and enhanced **operational runbooks**, collaborating closely with infrastructure engineering teams to ensure smooth deployment and management of network services.
- Worked with **networking technologies** including **Envoy** and **eBPF**, optimizing global traffic flows and improving system performance.
- Containerized distributed systems applications using **Docker** and deployed them to **AWS EC2** instances, ensuring predictable rollouts and resource management.

SKILLS

Languages – Go, Rust, C++, Python, Java, SQL

Networking – TCP/IP, HTTP, DNS, eBPF, Envoy, HAProxy, IPVS, WAF

Distributed Systems – Large-scale systems design, Traffic management, Network infrastructure, Load balancing, Proxying

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Development Practices – Agile methodologies, Code quality, Automated testing, Technical documentation, Incident response, CI/CD, Git, Jenkins

PROJECTS

High-Throughput Network Traffic Management System (HCL Technologies)

- Developed a distributed system in **Go** to manage and optimize high-volume network traffic, processing approximately **5,000 requests per second**.
- Implemented **TCP/IP** and **HTTP** protocol handling for enhanced network communication, ensuring reliable data transfer across distributed nodes.
- Integrated performance monitoring tools to track latency and throughput, identifying bottlenecks and improving overall system responsiveness by **18%**.

eBPF-based Network Monitoring and Security (HCL Technologies)

- Engineered a network monitoring solution using **eBPF** in **Rust** to gain deep visibility into packet flows and system calls on Linux servers.
- Developed custom **eBPF** programs to detect anomalous network behavior and potential security threats, reducing false positives in alerts by **30%**.
- Authored detailed technical documentation and operational guides for deploying and managing the **eBPF** monitoring agents across a fleet of **200+ servers**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
