HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed Python scripts to automate data extraction and transformation for generating operational reports, reducing manual effort by approximately 40% for the finance team.
- Designed and implemented REST APIs using Java Spring Boot to support data exchange between enterprise systems, ensuring seamless integration and data consistency.
- Managed production support for Java/.NET applications, responding to P1/P2 incidents and ensuring adherence to strict SLAs within a regulated financial services environment.
- Contributed to laboratory and process validation report packages for downstream purification studies, meticulously documenting experimental procedures and outcomes.
- Assisted with root cause analysis of process deviations by examining scientific data and laboratory records to identify contributing factors.
- Participated in cross-functional investigations to resolve complex process issues, collaborating with manufacturing and quality assurance teams.
- Containerized Java Spring Boot services using Docker for consistent deployment across development and production environments on AWS EC2.

SKILLS

Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Hibernate, JPA

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query

Process Science Tools – Chromatography, Process Validation, Root Cause Analysis, Laboratory Studies

PROJECTS

Automated Data Pipeline for Operations Reporting

- Developed a Python-based ETL pipeline to ingest data from multiple enterprise systems, transforming and loading it into a central PostgreSQL database for daily operational reporting.
- Implemented data validation checks within the pipeline to ensure data accuracy and integrity, reducing data-related errors in downstream reports by approximately 15%.
- Created scheduled jobs using cron on Linux to automate pipeline execution, delivering timely data extracts to business analysts for report generation.

Biologics Downstream Process Optimization Study

- Executed small-scale chromatography studies to evaluate different buffer conditions and resin types for optimizing the purification of a target biologic.
- Analyzed experimental results using R and pandas to identify key parameters influencing yield and purity, presenting findings that informed process development decisions.
- Documented all experimental procedures, results, and analysis in a comprehensive study report, adhering to Good Laboratory Practice (GLP) principles.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
