PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed high-performance, **distributed**, and **multithreaded** Java applications for front-office trading workflows, processing interest rate products.
- Contributed to system architecture and technical design for a **Core Java** trading platform, focusing on scalability and reliability improvements.
- Optimized application performance through **JVM profiling** and debugging, resolving complex technical issues to maintain system integrity.
- Collaborated directly with traders, business analysts, and global engineering teams to gather requirements and deliver technology solutions for the trading platform.
- Participated actively in **Agile development**, **test-driven development (TDD)**, and **CI/CD pipelines**, ensuring robust and efficient software delivery.
- Provided **Level 3 production support** for critical trading applications, diagnosing and resolving intricate technical challenges under pressure.
- Containerized Java trading applications using **Docker** and deployed them to a **Kubernetes/EKS** environment, managing configuration and resource allocation.

SKILLS

Core Java – Java 25, multithreading, concurrency, asynchronous programming, distributed systems, JVM profiling, performance tuning, debugging

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito

Databases – PostgreSQL, Oracle, MySQL

DevOps & Cloud – Docker, Kubernetes, EKS, OpenShift, Jenkins, Git, CI/CD

Methodologies – Agile, Scrum, Test-Driven Development (TDD)

PROJECTS

Enterprise Java Trading System Enhancement

- Refactored core Java components of a financial trading system to improve performance and reduce latency, targeting interest rate products.
- Implemented asynchronous messaging patterns using **Kafka** to decouple services within the trading platform, enhancing scalability and fault tolerance.
- Developed and maintained robust REST APIs using **Spring Boot** and **JPA** for seamless integration with downstream financial services.

Production Support Automation for Financial Services

- Automated critical production support tasks for a payments operations dashboard using **Python** scripting, reducing manual intervention by **40%**.
- Developed and maintained **SQL** queries for data validation and ad-hoc reporting on transaction flows, supporting reconciliation workflows for an enterprise client.
- Enhanced monitoring and alerting capabilities for the payments dashboard by integrating **Splunk** logs with automated incident response scripts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
