HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and produced **2D and 3D engineering drawings** for industrial augers and screw conveyors, translating initial concepts into detailed manufacturing specifications.
- Assisted in the design and development of specialized machinery and fabricated components, ensuring practicality for manufacturing within a fabrication environment.
- Prepared detailed **sheet metal fabrication drawings** and manufacturing instructions, collaborating with the production team to optimize designs for workshop processes.
- Modified and updated existing **engineering drawings** based on feedback from production and product development teams, maintaining drawing integrity.
- Supported ongoing product development initiatives by contributing to design iterations and providing technical documentation for new machinery features.
- Contributed to the creation of **bills of materials** and material specifications, ensuring accurate component selection for fabricated assemblies.
- Containerized design tools and utilities using **Docker**, streamlining deployment and ensuring consistent environments across the engineering team's workstations.

SKILLS

CAD Software – SolidWorks, AutoCAD

Engineering Disciplines – Mechanical Engineering, Engineering Design, Product Design

Manufacturing Processes – Sheet Metal Fabrication, Welding, Workshop Processes

Design & Documentation – 2D Drawings, 3D Drawings, Bills of Materials, Material Specifications

Industry Experience – Industrial Machinery, Screw Conveyors, Augers, Tub Feeders

Core Skills – Attention to Detail, Teamwork, Communication, Problem-Solving

PROJECTS

Industrial Auger Design Automation

- Developed a series of **SolidWorks macros** to automate the generation of standard auger flighting drawings, reducing manual drafting time by an average of 40% per design.
- Integrated parametric design principles into custom auger components, allowing for rapid modification and adaptation to varying customer specifications.
- Produced comprehensive manufacturing drawing packages, including assembly views and detailed component sheets, for a new line of industrial augers.

Sheet Metal Fabrication Drawing Standardization

- Created a standardized template library for **AutoCAD** sheet metal fabrication drawings, incorporating best practices for bend allowances, hole callouts, and material notations.
- Implemented a review checklist for fabricated component drawings to ensure consistency and adherence to workshop capabilities, reducing rework by approximately 15%.
- Worked with fabrication leads to validate drawing specifications against actual workshop processes, improving the accuracy of manufacturing outputs.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
