HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **automated API tests** for backend services and third-party integrations using Python, adhering to contract testing principles and achieving **~95% coverage** for critical data flows.
- Contributed to the evolution of an existing **test automation framework**, refactoring flaky tests and improving suite execution reliability by **15%** through targeted code reviews and performance tuning.
- Implemented **database validation** using SQL queries across PostgreSQL and Oracle databases to verify data integrity and consistency post-transaction processing for enterprise systems.
- Partnered with developers and product managers within a **Scrum Agile** framework to define acceptance criteria and shape backend test automation strategies, influencing design decisions before implementation.
- Integrated automated test suites into **CI/CD pipelines** using Jenkins, ensuring consistent and reliable test execution during build and deployment cycles.
- Prepared and shared comprehensive **test documentation** and results, including defect reports and test summary analyses, with the QA team and cross-functional stakeholders.
- Containerized test execution environments using **Docker**, enabling consistent and isolated test runs across development, staging, and production-like environments on AWS.

SKILLS

Languages – Python, Java, SQL, JavaScript, TypeScript, Bash

Testing Frameworks – Playwright, Cypress, WebDriverIO, Cucumber, JUnit, Pytest

Tools & Platforms – Git, Jenkins, Docker, Postman, Jira, Confluence, Splunk, Dynatrace, AWS, PostgreSQL, Oracle, MySQL

Methodologies – Agile, Scrum, Kanban, Test Automation, API Testing, Contract Testing, Integration Testing, CI/CD, TDD

Concepts – Backend Services, Database Validation, API Contracts, Web Request/Response, Cloud Environments, Test Principles, SCAYLE Integrations

PROJECTS

Retail Systems Integration Test Suite (HCL Technologies)

- Built a comprehensive suite of **automated integration tests** for backend retail systems using Python and Pytest, focusing on order management and payment processing workflows.
- Implemented **database validation** checks against PostgreSQL to ensure transactional data consistency across interconnected services, catching **~30%** of data-related defects before UAT.
- Integrated test runs into a **Jenkins CI/CD pipeline**, automating execution on code commits and providing rapid feedback to the development team on integration stability.

API Contract Validation Framework (HCL Technologies)

- Developed a Python-based framework for **API contract testing**, ensuring adherence to defined schemas and reducing integration issues between microservices.
- Designed and implemented validation rules for request and response payloads, identifying and documenting **over 150 contract deviations** during initial rollout.
- Collaborated with developers to define and maintain API contracts, promoting a shared understanding of service interfaces and improving inter-team communication.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
