PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and built the **front-end foundation** for a new **React** and **TypeScript** codebase, establishing component structure, state management patterns, and initial **testing standards**.
- Developed **data-dense internal UIs**, including large tables and multi-step workflows, for merchandising operations tooling, ensuring correctness and responsiveness for operational users.
- Implemented **AI-assisted development workflows** using Claude for code generation and review, authoring reusable **repo rules** and integrating agentic tooling into the team's development lifecycle.
- Migrated legacy merchandising tools from an **Angular** application to a modern **SaaS commerce platform**, incrementally rebuilding and retiring older pages while integrating with new backend services.
- Integrated front-end applications against **platform APIs** and event-driven backend services, collaborating with backend engineers on API contracts and data shape definitions.
- Operated within an **Agile/Kanban SDLC**, participating in iterative delivery cycles and actively contributing to sprint planning, technical estimation, and code reviews.
- Containerized front-end applications using **Docker** and managed deployments within a cloud environment, ensuring consistent build and runtime configurations.

SKILLS

Frontend Frameworks – React, TypeScript, Angular, Vue

Backend Integration – Node.js, REST APIs, GraphQL, Event-Driven Architectures

AI Development Tools – Claude, Prompt Engineering, Agentic Tooling

Cloud & DevOps – AWS, Docker, CI/CD, Jenkins

Data Handling – Data-Dense UIs, State Management, Component Libraries

Methodologies – Agile, Kanban, Scrum

PROJECTS

Merchandising Operations Tooling Replatform

- Led the front-end development effort to replatform internal merchandising tools, building a new **React** and **TypeScript** application to replace legacy **Angular** components.
- Designed and implemented reusable UI components and state management patterns for a data-intensive back-office application, improving developer velocity for the team.
- Integrated the new front-end with backend microservices via **REST APIs**, defining clear contracts and ensuring seamless data flow for catalog and promotion management.

AI-Assisted Code Generation and Review Framework

- Developed a framework for team-wide adoption of **Claude**, including prompt libraries and **repo-level rules** to standardize AI-assisted code generation and review processes.
- Built example workflows demonstrating the use of agentic tooling for tasks such as unit test generation and code migration analysis, reducing manual effort by approximately **15%** on pilot tasks.
- Documented best practices for integrating AI assistance into the SDLC, enabling faster iteration and knowledge sharing across the engineering team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
