HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Configured and developed directly within customer sandboxes and production environments using **Data 360**, **SQL**, and **Python** to implement approved solution designs.
- Engineered data ingestion and harmonization pipelines for batch and streaming sources, materializing views optimized for analytical workloads and tuning latency.
- Built and maintained the AI data integration layer, including **RAG** and **vector search** configurations, to ground agent solutions in real-time enterprise data.
- Designed and implemented protocols for agent communication, including **Model Context Protocol (MCP)**, to govern collaboration among specialized AI agents.
- Debugged complex issues across ingestion failures, identity anomalies, and query behavior by methodically analyzing logs and query evidence.
- Collaborated with customer technical teams through pairing and code reviews to co-build solutions and ensure a supportable handoff.
- Containerized Python services using **Docker** and deployed them to a Kubernetes cluster (EKS), managing configurations and resource limits.

SKILLS

Data Engineering – Data 360, SQL, Python, RAG, Vector Search, MCP, REST Query API, Interaction SDK, Data Kits, Batch & Streaming Ingestion, Identity Resolution, Data Harmonization, Feature Store

Cloud & Deployment – AWS, Kubernetes, Docker, EKS, Salesforce DX, CLI, Git, Change Management, Release Controls

Programming Languages – Python, SQL, Apex

Data Management – Data Governance, Structured & Unstructured Data, CRM, Data Cloud

AI & Agentic Workloads – Agentforce, AI Data Integration, Knowledge Bases, Search Indexes, Agent-to-Agent Communication

Tools & Methodologies – Salesforce Flow, Jira, Confluence, Agile, Scrum

PROJECTS

Customer Data Platform Implementation for Enterprise Client

- Developed Python scripts and SQL queries to ingest and transform customer data from various sources into a unified customer data platform.
- Built and configured the identity resolution layer within the platform, ensuring accurate customer profiles by de-duplicating records based on defined matching rules.
- Designed and implemented data activation pipelines to feed insights into downstream marketing and sales applications, improving campaign targeting accuracy by 18%.

AI Agent Data Grounding Layer (MSc Applied Project)

- Engineered a Retrieval-Augmented Generation (RAG) pipeline using Python and a vector database (Pinecone) to provide real-time context for an LLM.
- Extracted and embedded relevant documents from a knowledge base into the vector store, enabling the AI agent to retrieve accurate information for user queries.
- Evaluated the agent's response quality based on relevance and factual accuracy, achieving a 92% score on a set of benchmark questions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
