HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot REST APIs** for a financial-services client, handling approximately 5,000 requests per second during peak hours.
- Developed and maintained **Java applications** using **Hibernate**, managing complex object-relational mappings for enterprise data persistence across multiple databases, ensuring data integrity for over 10 million records.
- Engineered **Python automation scripts** to streamline ETL processes for data ingestion into an enterprise data warehouse, reducing manual processing time by **40%**.
- Contributed to the development of **agentic AI solutions**, focusing on prompt engineering and the integration of LLM capabilities into customer workflows, directly supporting the creation of a proof-of-concept for a new AI-driven customer service tool.
- Built and deployed **Python-based data pipelines** on **AWS Lambda** and **S3**, processing approximately 3,500 events per second to feed downstream AI model training datasets.
- Collaborated with customer architects and senior engineers to define technical requirements for **AI agent deployments**, translating business needs into actionable technical specifications for production environments.
- Containerized **Java Spring Boot applications** using **Docker** and deployed them to a Kubernetes cluster, configuring basic resource limits and monitoring for predictable operational performance.

SKILLS

AI/ML – LLMs, Prompt Engineering, Agentic AI, Generative AI, AI Agents, Model Training, Model Evaluation, scikit-learn, R

Languages – Python, Java, SQL, JavaScript, TypeScript, R

Backend Frameworks – Spring Boot, Hibernate, JPA, FastAPI, Flask, NestJS

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, CI/CD

Data Platforms – PostgreSQL, MySQL, Oracle, Snowflake, Databricks, Data 360

Tools & Methodologies – Jira, Confluence, Agile, Scrum, API Design, Data Modeling, Data Warehousing, ETL

PROJECTS

Customer AI Agent Integration (HCL Technologies)

- Developed a **Python-based integration layer** to connect a customer's internal systems with a new AI agent platform, enabling automated data retrieval for AI-driven decision support.
- Engineered **API endpoints** using **FastAPI** to expose processed data to the AI agent, ensuring secure and efficient communication for real-time operations.
- Designed and implemented **prompt templates** for the AI agent, enabling it to generate contextually relevant responses and take automated actions based on customer data inputs.

Financial Transaction Monitoring Dashboard (HCL Technologies)

- Built a **Java Spring Boot application** to process and monitor financial transaction data streams, identifying and alerting on anomalies and failed processing events.
- Developed **REST APIs** for data ingestion and retrieval, supporting integration with upstream and downstream operational systems for a financial services client.
- Implemented **SQL queries** against a PostgreSQL database to aggregate transaction status and generate operational reports, contributing to enhanced reconciliation workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
