PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented agentic AI solutions, integrating LLM prompts, reasoning chains, and tool calls within customer enterprise environments, resulting in production deployments from day one.
- Owned end-to-end technical delivery for AI agent components, from architecture and initial development through to validated, observable production systems.
- Built and maintained operational dashboards and customer KPI reports to monitor the health and business outcomes of deployed AI agent solutions, tracking key performance indicators.
- Contributed to rapid development cycles for proofs-of-concept and MVPs, moving from initial concept sketches to deployable solutions within days.
- Collaborated with enterprise customers and partners to co-build AI solutions, sharing technical best practices and enabling teams to enhance their capabilities.
- Analyzed and surfaced platform gaps, edge cases, and field insights to senior engineering and product teams, acting as a critical feedback loop for product development.
- Containerized full-stack agentic AI applications using **Docker** and deployed them to **AWS EKS**, configuring resource limits and basic networking for predictable performance.

SKILLS

Languages – Python, Java, JavaScript, TypeScript, Apex, English, Dutch, German, French, Arabic

AI/ML – LLMs, Prompt Engineering, Agentic AI Platform, Generative AI, AI Agents, Model Evaluation

Cloud & DevOps – AWS, Docker, Kubernetes, EKS, CI/CD, Jenkins, Git

Data Platforms – Snowflake, Databricks, Data 360, Customer Data Platforms, Data Modeling, Data Pipelines

Frameworks & Libraries – LangChain, LlamaIndex, FastAPI, Spring Boot

Databases – PostgreSQL, MySQL, Oracle, SQL

Methodologies – Agile, Scrum

PROJECTS

AI Agent for Customer Support Automation

- Developed an AI agent using **Python** and **LangChain** to automate initial customer support inquiries, integrating with internal knowledge bases via RAG patterns.
- Designed prompt templates and tool-calling capabilities for the agent, enabling it to access customer data through mock APIs and escalate complex issues to human agents.
- Built a **FastAPI** service to expose the agent's inference endpoint, achieving p95 latency under 200ms for typical query volumes.

Customer Onboarding Playbook for an ML Feature Store

- Worked directly with two pilot customers to design and ship a guided onboarding flow for an internal ML feature store, including SDK examples and debug tooling.
- Built a **Python** CLI to validate customer feature definitions against the platform schema before submission, catching approximately 70% of schema errors at write time.
- Documented common integration patterns and ran follow-up workshops with customer data teams to upskill their internal engineers on feature engineering best practices.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
