PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented AI agent intelligence, including prompt engineering, reasoning logic, and tool integration with customer systems, directly within the company's AI platform.
- Owned the end-to-end technical delivery of agentic solutions, from initial architecture selection to production deployment, validation, and ongoing observability.
- Developed and maintained customer-facing dashboards for key performance indicators (KPIs) and agent performance, ensuring visibility into deployment health and business outcomes.
- Contributed to the rapid development of proofs-of-concept (POCs) and Minimum Viable Products (MVPs), transitioning them from initial sketches to deployable solutions within days.
- Collaborated with enterprise customers and partners on technical implementations, facilitating knowledge transfer and upskilling teams on best practices for AI solution deployment.
- Translated complex customer business challenges into actionable agentic solutions by partnering closely with Deployment Strategists.
- Containerized full-stack agent applications using **Docker** and deployed them to **AWS EKS**, configuring basic resource limits and monitoring for predictable performance.

SKILLS

AI/ML – AI agents, Agentic AI platform, LLM techniques, prompt engineering, reasoning, tool calls, fine-tuning, model evaluation

Programming Languages – Python, JavaScript, TypeScript, Java, Apex, SQL

Cloud & Data Platforms – Salesforce Data 360, Snowflake, Databricks, customer data platforms, AWS, EC2, S3, Lambda, CloudWatch

Development Tools & Practices – Docker, Kubernetes, CI/CD, Git, Jira, Confluence, REST APIs, integration patterns, data modeling, Agile methodologies

Customer Engagement – Forward Deployed Engineering, technical delivery, proofs-of-concept, MVPs, customer onboarding, stakeholder management, technical enablement

PROJECTS

Customer AI Agent Implementation (HCL Technologies)

- Developed and deployed a **Python**-based AI agent for a financial services client to automate transaction anomaly detection, integrating with their existing **PostgreSQL** database.
- Designed the agent's reasoning logic and prompt structures to process transaction data, aiming to reduce manual review time by identifying suspicious patterns.
- Collaborated with the client's operations team to gather requirements and validate agent outputs, ensuring alignment with business needs and improving their monitoring workflows.

Production Deployment & Observability for Enterprise Systems (HCL Technologies)

- Built and maintained **Java Spring Boot** microservices that served as the backend for an enterprise operations dashboard, processing real-time transaction data.
- Implemented **REST APIs** for data ingestion and querying, ensuring seamless integration with upstream and downstream systems.
- Containerized services using **Docker** and deployed them onto **AWS EC2** instances, establishing basic CI/CD pipelines with **Jenkins** for automated builds and deployments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
