HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented agent intelligence, including prompts, reasoning logic, and tool integrations, for production AI solutions used by enterprise customers.
- Owned end-to-end technical components for AI agent deployments, from initial architecture decisions to fully validated and observable production systems.
- Built and maintained agent performance dashboards and **customer KPI reporting**, tracking deployment health and measurable business outcomes for deployed AI agents.
- Contributed to rapid development of **proofs-of-concept and MVPs**, translating conceptual designs into deployable solutions within days.
- Collaborated with customer teams to translate complex business challenges into actionable agentic solutions, sharing best practices and enabling their technical staff.
- Actively experimented with emerging **AI tools, models, and frameworks**, surfacing platform gaps and field insights to product teams for continuous innovation.
- Containerized backend services with **Docker** and deployed them to a cloud platform, configuring resources for predictable rollout and observability.

SKILLS

AI/ML – Generative AI, LLMs, Prompt Engineering, Agentic AI, AI Agents, AI Solutions, AI Tools, AI Models, AI Frameworks, Vector Databases, Embeddings, RAG

Programming Languages – Python, JavaScript, TypeScript, Java, Apex, Greek

Cloud Platforms – AWS, Salesforce Data 360, Snowflake, Databricks

Data & Integration – Data Modeling, APIs, Integration Patterns, Data Pipelines, Customer Data Platforms

Development Tools & Methodologies – Cursor, Claude, Vibes, Full-Stack Deployment, Agile, Scrum, CI/CD, Git, Docker, Kubernetes

PROJECTS

Customer AI Agent Deployment Framework

- Developed a reusable framework for deploying AI agents into enterprise customer environments, focusing on prompt engineering and tool integration with **LLM APIs**.
- Built data pipelines on cloud platforms to feed agent decision-making processes, ensuring data integrity and timely delivery for real-time actions.
- Designed and implemented agent performance dashboards using **Python** and data visualization libraries to monitor key operational metrics and business impact.

Production AI Agent for Workflow Automation

- Engineered an AI agent capable of performing automated actions within customer systems, integrating with existing APIs and adhering to strict production constraints.
- Implemented robust error handling and logging mechanisms for the agent's operations, ensuring traceability and facilitating rapid issue resolution.
- Collaborated with a deployment strategist to gather customer requirements and deliver a functional MVP, demonstrating agent capabilities through technical walkthroughs.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
