PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **AI agent logic**, including prompt engineering, reasoning chains, and tool integration for enterprise customer systems, utilizing the **Agentic AI platform** and **LLM techniques**.
- Owned end-to-end technical components for agent deployments, from architecture selection to production validation and observability, ensuring solutions were deployable from day one.
- Built and maintained **agent performance dashboards** and **customer KPI reporting** to monitor deployment health and measure business outcomes, enabling proactive issue resolution.
- Contributed to rapid development cycles for **proofs-of-concept** and **MVPs**, transitioning concepts from initial sketches to deployable solutions within days.
- Collaborated with customer architects and engineering teams to translate complex business challenges into actionable **agentic solutions**, ensuring successful production deployments.
- Acted as a technical point of contact for enterprise customers, gathering requirements for **AI agent customization** and providing technical enablement to their teams.
- Containerized agent microservices using **Docker** and deployed them to a **Kubernetes** cluster, managing configurations and ensuring observable application performance.

SKILLS

AI/ML – AI Agents, LLMs, Prompt Engineering, Generative AI, Agentic AI Platform, Fine-tuning, Model Evaluation

Programming Languages – Python, JavaScript, TypeScript, Java, Apex

Data & Integration – Data Pipelines, Data Modeling, APIs, Snowflake, Databricks, Salesforce Data 360

Cloud & DevOps – AWS, Kubernetes, Docker, CI/CD, Observability, Jenkins

Customer Facing – Technical Delivery, Solution Design, Production Deployment, Customer Onboarding, Stakeholder Management, Proofs-of-Concept

PROJECTS

Customer AI Agent Deployment (HCL Technologies)

- Developed and deployed a **Python-based AI agent** for a financial services client to automate transaction anomaly detection, integrating with their existing payments operations dashboard.
- Designed and implemented **prompt engineering strategies** and data pipelines to process ~15,000 transaction records daily, improving fraud alert accuracy by 18%.
- Collaborated with the client's operations team to gather requirements, conduct UAT, and provide post-implementation support for the deployed agent solution.

Internal Feature Engineering Pipeline (HCL Technologies)

- Engineered a **Python data pipeline** on AWS Lambda and S3 to extract and transform features for internal analytics, processing approximately 3,500 events per hour.
- Wrote **SQL queries** against PostgreSQL to validate data integrity and schema consistency for over 50 distinct feature sets.
- Containerized the pipeline components using **Docker** for consistent deployment across development and staging environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
