HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Investigated and resolved **production defects** and **integration failures** on enterprise applications, contributing to a **15% reduction** in recurring P1 incidents.
- Developed **Python scripts** to automate data extraction and transformation for scheduled reports, processing approximately **500,000 records** per run.
- Designed and implemented **Java Spring Boot REST APIs** for inter-service communication, handling up to **2,000 requests per minute** during peak loads.
- Built **AI agent workflows** using Python and natural language processing techniques to automate the classification and initial response for Tier 1 support cases, reducing manual triage time by **30%**.
- Participated in **incident response rotations**, analyzing logs via **Splunk** and **Dynatrace** to identify root causes and implement preventative code fixes.
- Wrote, tested, and deployed maintainable code for **automation tools** aimed at reducing manual effort in access request fulfillment and system maintenance tasks.
- Containerized backend services using **Docker** and deployed them to an **AWS EC2** environment, ensuring consistent application behavior across development and production.

SKILLS

Programming Languages – Python, Java, SQL, JavaScript, TypeScript, Go

Frameworks & Libraries – Spring Boot, Hibernate, JPA, Flask, FastAPI, scikit-learn, pandas, NumPy

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, R/RStudio

Methodologies & Concepts – Agile, Scrum, CI/CD, REST APIs, AI Agents, LLM, RAG, Observability, Debugging, Version Control

PROJECTS

Production Incident Automation Platform (HCL Technologies)

- Developed a **Python-based automation platform** that analyzed system logs using **Splunk** queries to predict and preemptively alert on potential production issues, reducing critical incident occurrences by **22%**.
- Engineered **REST APIs** using **Java Spring Boot** to integrate with monitoring tools, allowing automated ticket creation in **Jira** for identified anomalies and streamlining the incident response workflow.
- Implemented **SQL scripts** for data validation and reconciliation across multiple databases (**PostgreSQL**, **Oracle**) to ensure data integrity within the automated reporting and alerting system.

Customer Knowledge Retrieval AI Agent

- Built a **Python-based AI agent** that ingested and indexed technical documentation and support tickets, enabling rapid retrieval of relevant information for complex customer queries.
- Integrated a **RAG (Retrieval-Augmented Generation)** system with a **large language model (LLM)** to provide contextually accurate answers, improving the first-contact resolution rate for support engineers by approximately **18%**.
- Developed a simple **FastAPI** interface for the AI agent, allowing internal teams to query the knowledge base and receive summarized solutions derived from vast technical documentation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
