PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed customer support cases end-to-end from initial triage to resolution, ensuring high CSAT and SLA compliance across a portfolio of 15 enterprise accounts.
- Analyzed, reproduced, and resolved complex technical issues, including API/integration challenges and system configuration problems for SaaS applications.
- Guided customers on best practices for optimizing workflows and preventing recurring issues, authoring 12 Knowledge Base Articles that reduced common ticket escalations by 18%.
- Partnered with engineering and product teams to resolve critical blockers, contributing to team knowledge sharing and a collaborative culture through regular sync-ups.
- Developed Python scripts to automate data extraction and reporting tasks, reducing manual effort for the operations team by approximately 10 hours per week.
- Performed production support for enterprise Java applications using Splunk and Dynatrace, managing SLA adherence and P1/P2 incident response for critical services.
- Containerized Java Spring Boot services using Docker, deploying them to an AWS EC2 environment managed via Jenkins CI/CD pipelines.

SKILLS

Customer Success – Customer Support, Technical Support, Application Support, SaaS, CSAT, SLA Compliance, Knowledge Base Authoring

Programming & Scripting – Python, Java, Spring Boot, REST APIs, Shell Scripting

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases & Data – SQL (PostgreSQL, MySQL, Oracle), Data Analysis, ETL, Data Warehousing

Observability & Tools – Splunk, Dynatrace, Jira, Confluence

Languages – English, Spanish

PROJECTS

Enterprise Application Support Automation

- Developed a suite of Python scripts to automate routine production support tasks for enterprise Java applications, including log aggregation and alert correlation.
- Integrated scripts with Splunk and AWS CloudWatch APIs to provide real-time operational insights, reducing manual data retrieval time by 40% for incident analysis.
- Created automated reporting mechanisms that consolidated key performance metrics, enabling operations teams to track system health and SLA adherence more effectively.

Customer Workflow Optimization Tool

- Designed and implemented a Python-based tool to analyze customer workflow patterns and identify areas for optimization within a financial services operations dashboard.
- Translated complex customer requirements into actionable technical specifications, collaborating with business analysts to ensure alignment with client needs.
- Built interactive dashboards using data extracted via SQL queries against PostgreSQL, visualizing performance bottlenecks and providing recommendations for improvement.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
