PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered **Python** data pipelines on **AWS Lambda** to process and transform approximately **3,500 events per second**, replacing a less efficient batch processing system.
- Designed and implemented **Java Spring Boot** REST APIs for inter-service communication, incorporating **circuit breaker patterns** for enhanced system resilience.
- Developed **Hibernate** mappings and optimized **SQL** queries for the persistence layer, improving data retrieval performance by an average of **20%** for core financial reporting.
- Collaborated with customer engineering teams to integrate **AI-native applications**, adapting and deploying solutions in live production environments across multiple industry verticals.
- Built reusable **LLM-enabled solution scaffolds** and prompt libraries to accelerate the development and deployment of generative AI applications for enterprise clients.
- Operated in agile sprints to deliver production-ready **end-to-end AI solutions**, spanning backend logic, data orchestration, and front-end UI components.
- Containerized backend services using **Docker** and deployed them to **Kubernetes (EKS)**, managing configuration with **Helm** and ensuring predictable deployments.

SKILLS

AI/ML Tooling – LangChain, Semantic Kernel, prompt chaining, vector search, context management, MLflow, Weights & Biases, SageMaker, Vertex AI, AzureML, Kubeflow, Airflow, Prefect, TorchServe, Triton, vLLM, SHAP, LIME

Backend Development – Python, Node.js, Java, Spring Boot, REST APIs, GraphQL, Hibernate, JPA, FastAPI, Flask

Data Orchestration & Databases – SQL, PostgreSQL, MySQL, Oracle, vector DBs, pandas, Spark

Cloud & DevOps – AWS (EC2/S3/Lambda/CloudWatch), GCP, Azure, Docker, Kubernetes, CI/CD, Terraform, Helm, IaC

Frontend Development – React, Angular, UI components

Observability & Performance – Debugging distributed systems, latency tuning, monitoring

PROJECTS

Customer Onboarding for an Enterprise AI Platform

- Worked directly with two pilot enterprise customers to design and deliver a guided onboarding flow for an internal AI platform, including **SDK examples** and debug tooling.
- Built a **Python CLI** to validate customer AI feature definitions against the platform schema before submission, catching approximately **70%** of schema errors at write time.
- Documented common integration patterns and ran two follow-up workshops with customer data teams to upskill their internal engineers on the platform.

GenAI Solution Scaffolding for Enterprise Workflows

- Developed a reusable **LangChain-based scaffold** for building RAG-enabled applications, incorporating common prompt templates and vector database integration patterns.
- Engineered a **FastAPI inference service** to serve a fine-tuned LLM for a specific customer workflow, achieving p95 latency below **200ms**.
- Contributed reusable code assets and best practice documentation to an internal developer portal, accelerating adoption of generative AI capabilities across multiple customer engagements.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
