PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python** data pipelines on **AWS Lambda** and **S3** to process ~3,500 events/sec for downstream **ML** scoring, replacing a less efficient scheduled batch job.
- Developed and deployed **Java Spring Boot** microservices for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Containerized **Java** and **Python** services using **Docker** and deployed them to an **AWS EKS** Kubernetes cluster, managing configuration with **Helm** charts and basic resource allocation.
- Mentored junior engineers on best practices for **code reviews** and **agile development** methodologies, contributing to improved team code quality and sprint velocity.
- Collaborated with data scientists to translate complex model requirements into actionable feature engineering tasks, ensuring efficient data preparation for **ML** model training.
- Architected and built scalable **cloud-based ML platforms** and data pipelines on **AWS**, focusing on **MLOps** capabilities to support end-to-end model lifecycle management.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace** for monitoring and root cause analysis, adhering to strict SLAs for P1/P2 issues.

SKILLS

Cloud Platform – AWS (S3, EC2, Lambda, Glue, SNS, SQS, EKS), Docker, Kubernetes, Helm

Programming Languages – Python, Java, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, FastAPI

ML & MLOps – Machine Learning, MLOps, Data Pipelines, Model Development, Inference, Monitoring, Retraining, SageMaker (exposure)

CI/CD & DevOps – Jenkins, Git, CI/CD Pipelines, DevOps Tooling

Databases – PostgreSQL, RDS, Data Warehouses

API Development – REST APIs, Java, Python

PROJECTS

ML Feature Pipeline Automation (HCL Technologies)

- Engineered an end-to-end **Python** feature pipeline on **AWS** to extract behavioural signals from transaction logs for **ML** model development, processing approximately 1.1 million records.
- Trained a **LightGBM** classifier on extracted features, tuning class weights to address class imbalance and achieving an **AUC of 0.91** on held-out data.
- Deployed the trained model behind a **FastAPI** inference endpoint, implementing input validation and monitoring p95 latency at ~180ms.

Customer Onboarding for ML Platform (HCL Technologies)

- Developed a **Python** CLI tool to validate customer feature definitions against the **ML platform** schema, catching an estimated 70% of schema errors before submission.
- Designed and documented common integration patterns for a pilot enterprise customer, leading to a reduction in onboarding time from ~6 weeks to 9 days.
- Ran technical walkthrough sessions with the customer's data science team to upskill them on the platform's capabilities and best practices.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
