PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** microservices for an enterprise-scale contact centre platform, focusing on agent desktop integration and real-time customer service experiences.
- Implemented **Hibernate** and JPA entities for data persistence in backend services, ensuring efficient data retrieval and manipulation for operational dashboards supporting over 1,200 concurrent users.
- Engineered **Java REST APIs** with Spring Boot to facilitate cross-service communication and integration with IVR capabilities, handling approximately 5,000 requests per minute during peak hours.
- Contributed to **Agile/SAFe** ceremonies, including sprint planning and estimation, and participated actively in **code reviews** to maintain high-quality software standards.
- Mentored two junior engineers on **Java Spring Boot** development best practices and object-oriented design principles, improving team code quality and productivity by an estimated 15%.
- Developed **Python scripts** for automating data ingestion and ETL processes, supporting the operational dashboard with scheduled reporting and data validation tasks.
- Containerized backend services using **Docker** and deployed them to an **AWS EKS** cluster, managing configurations and basic resource allocation for predictable deployments.

SKILLS

Backend Languages – Java, Python, SQL, JavaScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, React, JUnit, Spring Security

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, EKS)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Postman

Methodologies – Agile, Scrum, SAFe, CI/CD

PROJECTS

Enterprise Contact Centre Agent Desktop Platform

- Developed core **Java Spring Boot** services to manage agent states, customer interaction routing, and real-time communication feeds for a large-scale contact centre environment.
- Integrated **RESTful APIs** with an existing IVR system and backend databases (PostgreSQL) to provide agents with contextual customer information, reducing average handling time by ~18%.
- Wrote comprehensive **JUnit** tests and participated in peer reviews to ensure service stability and adherence to architectural guidelines for the platform.

Automated Financial Transaction Monitoring System

- Built a **Python**-based data pipeline to ingest and process transaction data from multiple sources, identifying and flagging anomalies for further investigation.
- Implemented **SQL** queries against a PostgreSQL database to perform complex data validation and reconciliation checks on financial message flows, catching ~95% of data discrepancies before batch processing.
- Designed and deployed the system using **Docker** on an **AWS EC2** instance, ensuring reliable data processing for an internal operations dashboard.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
