HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Built and maintained native features for a route planning mobile application, translating design mockups into production-ready code for **Android (Kotlin)** and **iOS (Swift)**.
- Collaborated with the Tech Lead on application architecture, focusing on **offline use**, **background location tracking**, and optimizing **battery life** for drivers on the road.
- Owned the UI/UX for the driver application, designing and refining screens using **AI design tools** and platform guidelines to match real-world workflows, resulting in a **15% reduction** in reported usability issues.
- Integrated **AI coding assistants** (e.g., Claude Code, Cursor) to accelerate development cycles, meticulously reviewing and ensuring the quality and security of all shipped code.
- Wrote comprehensive unit and integration tests, participated in rigorous code reviews, and contributed to shaping the team's engineering and **AI practices**.
- Monitored application performance and stability in production using **Firebase Crashlytics** and **Sentry**, troubleshooting and resolving critical issues impacting driver operations.
- Containerized mobile app deployment pipelines using **GitHub Actions** and **Fastlane**, enabling automated testing and deployment to app stores.

SKILLS

Mobile Development – Kotlin, Jetpack Compose, Coroutines, Swift, SwiftUI, async/await, Kotlin Multiplatform, Android, iOS

AI & Design Tools – Figma AI, Claude, v0, Claude Code, Cursor, GitHub Copilot, Generative AI

App Architecture & Practices – MVVM, MVI, Dependency Injection, Unit Testing, Integration Testing, Code Review, CI/CD, Git

Platform Features – Background Work, Location Services, Battery Optimization, Push Notifications (FCM/APNs), Local Data Storage, Material Design, Human Interface Guidelines

Observability & Cloud – Firebase Crashlytics, Sentry, Datadog, AWS, Google Maps SDK, Mapbox SDK

Backend & Data – REST APIs, Python, TypeScript, LLM APIs, On-device ML, ML Kit, Core ML, PostgreSQL

PROJECTS

AI-Assisted Driver App Development (SmartRoutes)

- Developed core features for a last-mile delivery driver application using **Kotlin** and **Jetpack Compose**, integrating **AI-generated UI components** to accelerate prototyping.
- Implemented background location services and optimized data synchronization for **offline use**, ensuring reliable operation for drivers in areas with intermittent connectivity.
- Wrote unit and UI tests using **JUnit** and **Espresso**, achieving over **85%** code coverage for critical driver workflow modules.

Customer Route Optimisation UI (SmartRoutes)

- Designed and implemented user interfaces for a route planning platform using **SwiftUI** for the customer-facing mobile app, focusing on intuitive navigation and clear data visualization.
- Integrated with **REST APIs** to fetch and display optimized routes, delivery status, and driver updates, enhancing customer visibility into last-mile logistics.
- Collaborated with product stakeholders to refine UI/UX based on feedback, ensuring alignment with user needs and incorporating **AI-driven design suggestions** for layout improvements.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
