PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed end-to-end full stack applications using **C#** and **.NET Core**, encompassing web applications, user interfaces, and backend services.
- Engineered and maintained complex **SQL Server** queries, stored procedures, and views, optimizing database performance for critical business workflows.
- Collaborated with business users and analysts to gather and translate requirements into scalable technical solutions, participating in **Agile** ceremonies and sprint planning.
- Provided production support for enterprise applications, conducting root cause analysis for incidents and implementing performance tuning measures.
- Developed and enhanced RESTful APIs to facilitate seamless integrations between disparate enterprise systems, ensuring data consistency and reliability.
- Participated in code reviews, application design sessions, and testing phases to ensure the delivery of high-quality, scalable, and reliable solutions.
- Containerised applications using **Docker** and deployed them to cloud environments, managing configuration and resource allocation.

SKILLS

Development – C#, .NET Core, .NET Framework, Object-Oriented Programming, RESTful APIs, Web Applications, User Interfaces, Backend Services

Databases – Oracle, SQL Server, Complex SQL, Stored Procedures, Query Optimization, Performance Tuning, Relational Database Concepts, Data Modelling

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Linux

Methodologies – Agile, Scrum, Change Management

Financial Services – Enterprise Application Support, Production Support, Incident Response, Root Cause Analysis, System Integrations

PROJECTS

Enterprise Payments Workflow Automation

- Developed a **Java Spring Boot** application to automate reconciliation workflows for financial transactions, processing approximately 15,000 records daily.
- Integrated the application with PostgreSQL and Oracle databases, creating complex SQL queries for data validation and reporting purposes.
- Designed and implemented REST APIs for seamless data exchange with upstream and downstream systems, enhancing operational efficiency.

Real-time Transaction Monitoring Dashboard

- Built a **Python**-based backend service to ingest and process transaction data streams from multiple sources, supporting near real-time monitoring.
- Engineered data pipelines using Pandas and SQL to aggregate and transform data for analytical purposes, feeding into a monitoring dashboard.
- Wrote unit tests using Pytest to ensure the reliability of data processing logic and API endpoints.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
