HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python** automation scripts for provisioning and lifecycle management of virtual machines across **Nutanix AHV** and **VMware vSphere** environments, reducing manual deployment time by **40%**.
- Developed reusable **Terraform** modules for defining and managing cloud infrastructure resources on **AWS**, enabling self-service provisioning for development teams and standardizing deployments.
- Built and maintained **CI/CD pipelines** using **Jenkins** and **GitOps** principles to automate the deployment of infrastructure changes and application updates, improving release velocity and reliability.
- Created API-driven automation solutions using **Python Flask** to orchestrate infrastructure deployments and manage resources across hybrid cloud environments, integrating with platform APIs.
- Contributed to the development of internal developer tooling and self-service infrastructure solutions, enhancing developer productivity and reducing operational overhead for platform engineering.
- Established engineering best practices for **Infrastructure-as-Code** and automated compliance workflows, providing technical guidance and mentoring to junior engineers on the team.
- Automated infrastructure provisioning and configuration management across **KVM/QEMU** environments using **Ansible** playbooks, ensuring consistent and reproducible deployments.

SKILLS

Cloud Platforms – AWS, Azure, Nutanix AHV/Prism/AOS, VMware vSphere/ESXi, KVM/QEMU

Infrastructure as Code – Terraform, Ansible

Programming & Scripting – Python, Bash

DevOps & CI/CD – Jenkins, GitOps, Git, CI/CD

API & Orchestration – REST APIs, Python Flask

Containerization & Virtualization – Docker, Kubernetes

Observability & Policy – Observability, Policy-as-Code

PROJECTS

Hybrid Cloud Infrastructure Automation Platform

- Developed a comprehensive automation platform using **Python** and **Terraform** to manage infrastructure across **AWS** and on-premises virtualized environments (**VMware**, **Nutanix**).
- Engineered reusable **Infrastructure-as-Code** modules for common infrastructure patterns, enabling self-service provisioning and reducing deployment times by an estimated **35%**.
- Implemented **API-driven workflows** for automated provisioning and lifecycle management, integrating with existing enterprise systems and cloud provider APIs.

Automated Compliance and GitOps Workflows

- Designed and implemented automated compliance checks and remediation using **Ansible** and custom **Python** scripts, integrated into **CI/CD pipelines**.
- Established **GitOps** workflows for infrastructure changes, ensuring a single source of truth in Git and enabling automated, auditable deployments.
- Built reporting mechanisms to track compliance status across the hybrid cloud environment, providing visibility to engineering and operations teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
