PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Authored and refined prompts for **GPT-4** and **Claude 3**, iterating on structures to optimise response accuracy and logic formatting for workforce management use cases.
- Executed systematic testing frameworks on LLM outputs, categorising responses and logging performance metrics to identify hallucinations and improve overall reliability by approximately **15%**.
- Assisted in gathering, cleaning, and formatting datasets for prompt testing and few-shot examples, ensuring adherence to organisational data quality standards.
- Developed and tested early-stage POCs for AI-driven features, transforming initial concepts into functional prototypes that validated potential product capabilities.
- Collaborated with senior engineers to integrate prompt engineering outputs into early-stage POCs, bridging foundation model capabilities with user-facing value.
- Documented prompt experiments, including successes and failures, to share knowledge and best practices with the broader AI team, contributing to a central knowledge base.
- Containerised AI prototyping tools and services using **Docker** for consistent deployment across development and testing environments.

SKILLS

LLM & Generative AI – Prompt Engineering, GPT-4, Claude 3, Llama 3, Gemini, LLM Evaluation, Hallucination Detection, Few-Shot Learning, RAG Experiments

Programming & Scripting – Python, JavaScript, TypeScript, Bash Scripting, REST APIs

AI Development Tools – LangChain, LlamaIndex, OpenAI API, Anthropic API, Cursor, AI-Assisted Development

Data Handling & Preparation – Data Cleaning, Data Formatting, Dataset Curation, Quality Assurance, Security Standards

Cloud & DevOps – Docker, AWS (EC2, S3, Lambda, CloudWatch), CI/CD, Git, Jenkins

PROJECTS

AI-Powered Employee Onboarding Assistant POC

- Developed a Python-based prototype for an AI-driven employee onboarding assistant, using prompts to generate personalised welcome materials and answer common HR queries.
- Integrated with OpenAI's API to process user inputs and generate dynamic responses, demonstrating a functional proof-of-concept for automating initial onboarding tasks.
- Documented the prompt engineering process and evaluation criteria, highlighting the system's ability to reduce new hire query times by an estimated **20%**.

Generative AI for Customer Support Response Generation

- Engineered prompt templates in Python to assist customer support agents by generating draft responses to common inquiries, leveraging techniques for tone and accuracy.
- Conducted iterative testing on prompt variations against a dataset of past customer interactions to refine output quality and adherence to company communication guidelines.
- Explored few-shot learning examples within prompts to improve the model's understanding of specific product features and support workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
