HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed, built, and maintained **AWS** infrastructure including **EC2**, **S3**, and **Lambda**, ensuring high availability for core services.
- Operated and troubleshooted **Kubernetes** clusters (**EKS** on AWS), managing deployments, scaling, and networking for containerized applications.
- Automated recurring operational tasks and infrastructure deployments using **Python** scripting and **Jenkins** CI/CD pipelines, reducing manual intervention by approximately 40%.
- Investigated and resolved complex production incidents across cloud services, **Kubernetes** workloads, and application dependencies, identifying root causes to prevent recurrence.
- Developed and implemented comprehensive **monitoring and observability** solutions using **Splunk** and **CloudWatch**, creating dashboards and actionable alerts for platform health.
- Managed infrastructure permissions and addressed operational risks, including patching requirements and configuration weaknesses, to enhance platform security and maintainability.
- Collaborated with development teams to understand application requirements and translate them into scalable and reliable **cloud infrastructure** and platform solutions.

SKILLS

Cloud Platforms – AWS, Azure

Container Orchestration – Kubernetes, EKS, AKS, Docker

Infrastructure as Code – Terraform, CloudFormation

Programming & Scripting – Python, Java, Bash

CI/CD – Jenkins, Git

Monitoring & Observability – Splunk, CloudWatch, Dynatrace

Operating Systems – Linux, Windows

PROJECTS

Cloud Infrastructure Automation with Python and Terraform

- Engineered a Python-based framework to automate the provisioning and configuration of **AWS** resources, including **VPCs**, **EC2** instances, and **S3** buckets, for new project environments.
- Integrated **Terraform** modules into the CI/CD pipeline to manage infrastructure-as-code, ensuring consistent and repeatable deployments across development, staging, and production.
- Implemented automated health checks and self-healing mechanisms for critical cloud services, reducing mean time to recovery (MTTR) by an estimated 30% for automated recovery scenarios.

Kubernetes Platform Enhancement for Application Deployments

- Designed and deployed a **Kubernetes** cluster on **AWS EKS** to host microservices, configuring networking, storage, and ingress controllers for optimal performance.
- Developed **Bash** and **Python** scripts to streamline the deployment and management of **Kubernetes** workloads, including rolling updates and canary releases, improving deployment velocity for development teams.
- Established comprehensive monitoring using **Prometheus** and **Grafana** within the Kubernetes environment, providing real-time insights into pod health, resource utilization, and application performance.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
