PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed, deployed, and operated production **datacenter networks** using BGP and OSPF, contributing to the availability of high-performance compute fabrics.
- Owned routing and switching configuration standards, including change design, peer reviews, and safe execution across a growing network estate.
- Automated repetitive network tasks with **Python scripting** and Ansible, reducing manual intervention in configuration deployments by approximately 30%.
- Troubleshooted Layer 2/3 incidents end-to-end, including link flaps and routing issues, driving root cause analysis to implement lasting fixes.
- Partnered with compute and software teams during cluster build-outs, ensuring seamless integration of network infrastructure into new deployments.
- Qualified new network platforms and topologies, contributing to architecture and capacity planning for scalable network designs.
- Built and improved **monitoring and alerting** systems using Splunk and Dynatrace, ensuring rapid detection and resolution of operational issues.

SKILLS

Networking – BGP, OSPF, IS-IS, Layer 2, Layer 3, EVPN, VXLAN, Leaf-Spine, Ethernet Fabrics, RoCEv2, Congestion Control, Optics, High-Speed Ethernet

Automation & Scripting – Python, Ansible

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes

Protocols – TCP/IP, VLANs

Vendors & Platforms – Arista, Cisco, Juniper, Nvidia/Mellanox

Monitoring & Observability – Splunk, Dynatrace

PROJECTS

Enterprise Network Automation Platform

- Developed a **Python-based automation framework** to manage network device configurations across a large datacenter environment, reducing deployment times by 40%.
- Integrated **Ansible playbooks** for standardized OS upgrades and patch management on Cisco and Juniper devices, increasing patch compliance by 20%.
- Designed and implemented a centralized logging solution using **Splunk** to aggregate network device logs, improving incident detection and troubleshooting efficiency.

High-Performance Compute Fabric Integration

- Configured and validated **Ethernet AI/HPC fabrics**, including RoCEv2 support, to ensure high-speed, low-latency connectivity for GPU clusters.
- Collaborated with compute teams to troubleshoot and optimize network performance for machine learning training workloads, achieving a 15% reduction in inter-node communication latency.
- Documented network topology and operational procedures for the supercompute cluster, enabling faster onboarding for new infrastructure engineers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
