PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed a **scikit-learn** model for anomaly detection on ~1.1M transaction records, achieving **0.91 AUC** on held-out data.
- Engineered Python feature pipelines on **AWS Lambda** and **S3** to support downstream ML scoring, handling approximately **3,500 events/sec** during peak hours.
- Designed and implemented REST APIs in **Java Spring Boot** for cross-service data exchange, incorporating request validation and circuit-breaker patterns.
- Performed exploratory data analysis (EDA) on large datasets using **Python**, **Pandas**, and **NumPy** to uncover trends and identify patterns for business stakeholders.
- Created interactive dashboards and reports using **Power BI**, translating complex data into actionable insights for non-technical audiences.
- Collaborated with cross-functional teams to gather requirements, define project scope, and deliver solutions that addressed complex business problems.
- Containerized backend services using **Docker** and deployed them to a **Kubernetes** cluster, configuring basic resource limits for predictable rollouts.

PROJECTS

Fraud Detection Model for Transaction Data

- Engineered a feature pipeline in **Python** and **SQL** to extract behavioural signals from a transaction log of approximately **1.1M records**.
- Trained a **LightGBM classifier** on extracted features, tuning class weights to handle a 1:140 fraud imbalance and reaching **0.91 AUC** and **0.46 F1** on a held-out month.
- Packaged the trained model behind a **FastAPI** inference endpoint with input validation, achieving a p95 latency of approximately **180ms**.

Interactive Sales Performance Dashboard

- Developed a comprehensive **Power BI** dashboard to visualize sales performance metrics, tracking key indicators for an enterprise sales team.
- Implemented complex **DAX** measures and optimized **Power Query** scripts for efficient data extraction, transformation, and loading from multiple sources.
- Published interactive reports to the Power BI service, enabling stakeholders to perform self-service analysis and gain insights into sales trends.
