PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Supported product strategy and roadmap by gathering insights from clients, users, and clinical teams to inform new feature development for a health-tech platform.
- Translated complex user journeys and business needs into clear epics, features, user stories, and acceptance criteria for digital health solutions.
- Managed and refined product backlogs, prioritizing features and technical debt based on value, risk, and effort, with guidance from senior colleagues.
- Collaborated with engineering, QA, and UX teams to plan and deliver high-quality product releases, including managing sprint ceremonies and product demos.
- Assisted in embedding clinical requirements and safety considerations into product design from the outset, supporting clinical sign-off and risk assessments.
- Contributed to go-to-market strategies by supporting commercial teams in responding to bids and tenders, and explaining product capabilities in client meetings.
- Developed and maintained clear documentation in Jira and Confluence for product specifications and release notes, ensuring accessibility for cross-functional teams.

SKILLS

Product Management – Product Strategy, Roadmap Development, Business Cases, Market Insight, Client Feedback, Usage Data, Outcomes Data, Prioritisation, Requirements Gathering, Epics, Features, User Stories, Acceptance Criteria, Product Backlog Management, Release Planning, Go-to-Market Support, Bid and Tender Response

Agile & Delivery – Agile Delivery, Sprint Ceremonies, Product Demos, Stakeholder Workshops, Risk Management, Dependency Tracking, Peer Review, Change Requests

Healthcare & Compliance – Clinical Governance, Safety Considerations, Clinical Sign-off, Risk Assessment, Regulatory Frameworks, Quality Documentation, Requirements Traceability

Technical & Data – Technical Understanding, Data Analysis, Usage Data Analysis, Process Flows, System Diagrams

Tools & Collaboration – Jira, Confluence, Customer Success, Operations, Commercial Teams, Marketing Teams, Clinical Teams, Data Teams, Engineering Teams, QA, UX, Architecture

PROJECTS

Digital Health Platform Requirements Elaboration

- Gathered detailed requirements from clinical and commercial stakeholders for a new mental health feature within a digital wellness platform, translating needs into actionable user stories.
- Developed comprehensive process flows and system diagrams to illustrate user journeys and system interactions, facilitating clear communication between product and engineering teams.
- Supported the refinement of the product backlog for the mental health module, prioritizing enhancements based on user feedback and clinical safety requirements.

Client Onboarding Workflow Optimization

- Collaborated with the Customer Success team to understand pain points in the client onboarding process for an enterprise health-tech solution.
- Designed and documented an improved onboarding workflow, including user guides and initial setup steps, aimed at reducing time-to-value for new corporate clients.
- Facilitated UAT sessions with a pilot enterprise client to validate the updated onboarding documentation and gather feedback for iterative improvement.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
