## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Supported the product vision and roadmap for a digital health platform, gathering insights from clients, clinicians, and internal delivery teams to inform product strategy.
- Translated complex user journeys and business needs into clear epics, features, user stories, and acceptance criteria for software development cycles.
- Managed and refined product backlogs, prioritising features and technical debt based on value, risk, and effort estimations with guidance from senior product managers.
- Collaborated with engineering, QA, and UX teams to plan, refine, and deliver high-quality software releases, including managing sprint ceremonies and product demos.
- Contributed to business cases by outlining customer value, commercial impact, effort, and risk assessments for proposed product initiatives.
- Embedded clinical requirements and safety considerations into product development from inception, supporting risk assessments and change control processes.
- Developed and maintained product documentation in **Jira** and **Confluence**, ensuring clear and accessible information for product, engineering, and clinical teams.

## SKILLS

**Product Management** – Product Vision, Roadmap Development, Requirements Gathering, User Stories, Acceptance Criteria, Backlog Management, Prioritisation, Business Cases, Stakeholder Workshops, Release Planning, Product Demos, Clinical Governance, Regulatory Compliance

**Software Development Lifecycle** – Agile Methodologies, Scrum Ceremonies, User Journeys, Feature Development, Technical Debt Management, Code Reviews, Change Control

**Data & Analytics Tools** – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn, SQL, Data Warehousing, Statistical Analysis

**Programming Languages** – Java, Python, Spring Boot, REST APIs, SQL

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins, Git

**Enterprise Systems** – ERP Systems, Payments Operations Dashboards, Transaction Monitoring, Reconciliation Workflows

## PROJECTS

### HealthTech Product Discovery & Requirements Definition

- Led discovery sessions with clinical stakeholders and end-users to identify key pain points and requirements for a new mental health module.
- Documented complex user flows and business needs into detailed epics and user stories using **Jira**, including acceptance criteria for a **React**-based interface.
- Collaborated with UX designers to create wireframes and prototypes, facilitating stakeholder feedback loops to refine the product's core functionality.

### Digital Health Platform Feature Prioritisation & Backlog Management

- Developed a prioritisation framework based on user feedback, clinical impact, and commercial value, applied to a backlog of over 150 feature requests.
- Managed the product backlog for the platform's user engagement features, translating high-level objectives into actionable tasks for the engineering team.
- Assisted in the creation of business cases for new feature development, estimating effort and potential commercial impact for executive review.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
