PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Translated security architecture principles into actionable **Cybersecurity Implementation Plans** for complex project deployments, ensuring alignment with enterprise security standards.
- Developed detailed **Low-Level Security Design (LLD) documentation** for new infrastructure components, including network segmentation, access controls, and data encryption strategies.
- Executed comprehensive **security testing plans** to validate the effectiveness of implemented controls, identifying and documenting deviations from design specifications.
- Collaborated with **security, infrastructure, and project teams** to integrate security controls into existing enterprise environments, managing dependencies and resolving technical challenges.
- Supported **certification and accreditation activities** by preparing technical security documentation and evidence packages for review prior to production release.
- Managed the documentation and governance of security decisions, evidence, and artefacts throughout the project lifecycle, ensuring auditability and compliance.
- Containerized security tooling and monitoring agents using **Docker** for consistent deployment across hybrid cloud environments, reducing setup time by approximately **30%**.

SKILLS

Cyber Security Engineering – Security Architecture, Low-Level Design (LLD), Security Controls, Security Testing, Security Accreditation, Security Governance, Risk Management, Security Documentation, Infrastructure Security, Cloud Security

Programming & Scripting – Python, Java

Databases – PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

DevOps & CI/CD – Docker, Jenkins, Git

Monitoring & Observability – Splunk, Dynatrace

Methodologies – Agile, Scrum

PROJECTS

Enterprise Security Control Implementation Framework

- Designed and documented a repeatable framework for implementing enterprise security controls across hybrid cloud infrastructure, integrating **AWS security best practices** with on-premises systems.
- Developed **Python scripts** to automate the deployment and configuration of security agents and baseline security settings on new EC2 instances, reducing manual configuration effort by an estimated **40%**.
- Created **SOPs and technical guides** for security teams on the operation and maintenance of implemented controls, facilitating smoother transitions to production support.

Secure Network Design for Financial Services Application

- Authored **Low-Level Design (LLD) documentation** for network segmentation and firewall rule implementation for a critical financial services application, ensuring adherence to strict regulatory requirements.
- Collaborated with infrastructure teams to implement and test network access controls, validating connectivity and security posture using **Linux shell scripting** for diagnostic checks.
- Contributed to the security accreditation process by providing detailed design rationale and implementation evidence for the network security components.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
