HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Monitored and analyzed real-time cybersecurity events and alerts from SIEM and endpoint protection systems to detect potential security threats.
- Responded to and contained security incidents, collaborating with cross-functional teams to develop eradication and recovery strategies.
- Analyzed data from multiple security sources, including intrusion detection systems and firewalls, to identify patterns and indicators of compromise.
- Contributed to process improvements within the Cyber Fusion Center, exploring new technologies to enhance security operations and threat detection capabilities.
- Developed Python scripts to automate data collection for incident analysis and reporting, reducing manual effort by approximately **30%**.
- Managed production support for enterprise Java applications, responding to P1/P2 incidents and maintaining SLA adherence using **Splunk** and **Dynatrace**.
- Containerized Java Spring Boot services using **Docker** for consistent deployment across development and production environments on **AWS EC2**.

SKILLS

Cyber Security – Network Security, Forensic Computing, Cybersecurity, Incident Response, SIEM, Intrusion Detection Systems, Endpoint Protection, Antivirus, Firewalls

Cloud Computing – Cloud Security, AWS (EC2, S3, Lambda, CloudWatch)

Networking – TCP/IP Networking

Operating Systems – Linux, Operating Systems (OS)

Data Analytics – Data Analytics, Monitoring Tools

Programming & Scripting – Python, Java, Spring Boot, SQL

DevOps & CI/CD – Docker, Jenkins, Git

PROJECTS

Security Event Monitoring and Alerting System

- Developed a Python-based system to aggregate and analyze security logs from various sources, enabling real-time monitoring of network traffic and system events.
- Implemented custom alert rules within the system to detect suspicious activities, reducing the average detection time for critical security events by **15%**.
- Designed data parsing logic to normalize diverse log formats into a unified structure for easier analysis and correlation, handling approximately **1,000+** log entries per minute.

Production Support Dashboard for Financial Operations

- Built and maintained a Java Spring Boot application that provided a dashboard for monitoring transaction flows and operational alerts for a financial services client.
- Integrated with **Splunk** for log aggregation and analysis, enabling quick identification and triage of failed payment messages across production environments.
- Collaborated with operations teams to gather requirements and implement features for enhanced transaction monitoring and reconciliation workflows, supporting an 8-person team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
