HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented a **Python**-based workflow automation system for managing customer security questionnaires, routing approvals to subject matter experts and Legal stakeholders, processing over **500 requests** monthly.
- Developed a **Java Spring Boot** microservice to serve security posture data, integrating with internal databases and external APIs to provide up-to-date information for sales enablement, handling approximately **2,000 requests** per day.
- Built **data pipelines** using Python and SQL on AWS Lambda to ingest and transform security control evidence from various sources into a structured knowledge base for AI retrieval.
- Authored and maintained technical documentation and knowledge base articles for an AI-powered security question-answering platform, ensuring **source traceability** and accuracy for over **1,500 distinct security controls**.
- Collaborated with security analysts and sales teams to gather requirements for security due diligence processes, translating complex technical controls into business-friendly language for CISO-level engagements.
- Containerized the AI platform's backend services using **Docker** and deployed them to an **AWS EKS** cluster, configuring basic resource limits and health checks for operational stability.
- Implemented automated content refresh cycles for the security knowledge base, building scripts to identify outdated information and route it to subject matter experts for validation, reducing manual review time by **30%**.

SKILLS

Programming Languages – Python, Java, SQL, Bash

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, LangChain, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, EKS)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, AI/LLM Integrations, RAG

Methodologies – Agile, Scrum, CI/CD

PROJECTS

AI-Powered Security Due Diligence Platform (HCL Technologies)

- Developed a **retrieval-augmented generation (RAG)** system in **Python** to answer customer security questionnaires, integrating with a curated knowledge base of security controls and compliance documentation.
- Built data ingestion pipelines using **SQL** and **pandas** to process and structure evidence from multiple sources, ensuring data quality for the AI model's retrieval component, covering over **1,200 security controls**.
- Designed and implemented an API layer using **FastAPI** to serve validated answers to sales teams and customer-facing applications, achieving average response times of **150ms**.

Customer Security Trust Center Integration

- Engineered a **Java Spring Boot** service to expose Stripe's security posture and compliance evidence, enabling a self-service Trust Center for authenticated customers.
- Integrated the service with a **PostgreSQL** database containing security control details and compliance certifications, ensuring data consistency and real-time availability for customer inquiries.
- Collaborated with product and legal teams to define data requirements and presentation formats for the customer-facing security information portal.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
